It's a tale of humanity at its best and worst, of love andloss, of fear andheroism. It's the story of a woman who sought thestars and found morethan anyone imagined possible. When faced with its greatest challenge, will humanity rise to triumph or fall to ruin? * STARSHINE SPACE IS VAST AND UNTAMED, AND IT HOLDS MANY SECRETS. Now two individuals from opposite ends of settled space are on a collision course with the darkest of those secrets, even as the world threatens to explode around them. The year is 2322. Humanity has expanded into the stars, inhabiting over 100 worlds. Though thriving as never before, Earth struggles to retain authority over far-flung planets & free-wheeling corporations while an uneasy armistice with a breakaway federation hangs by a thread as the former rebels rise in wealth and power. Alexis Solovy is Earth Alliance royalty, her father a fallen war hero & her mother an influential military leader. But she seeks only the freedom of space & has made a fortune by reading the patterns in the chaos to discover the hidden wonders of the stars. Nothing about her latest objective suggests the secret it conceals will turn her life-not to mention the entire galaxy-upside down. But a chance encounter with a mysterious spy leads to a discovery which will thrust Alex into the middle of a galactic power struggle & a sinister conspiracy, whether she likes it or not. * VERTIGO Where do you run when there is no escape? Where do you turn when the enemy within is as dangerous as the enemy unknown? Humanity is under attack. An engineered war between rival superpowers escalates even as the shadowy Metigen armada begins attacking colonies on the fringes of settled space. Individuals from across the galaxy fight for their own survival & to protect those they hold dear while a group of unlikely allies race to expose a secret cabal. As the aliens draw ever closer, leaving destruction & death in their wake, the strongest defenders of Earth & Seneca fall to one another in a war of lies & misdirection. Alex Solovy and Caleb Marano stand accused of terrorism & murder. In a desperate gambit to clear their names & find a way to defeat the invaders, they breach the dimensional portal at the heart of the Metis Nebula. In a strange, mystical realm where nothing is what it seems, they will uncover secrets about humanity's past & future-and one revelation which will change everything. * TRANSCENDENCE What does it mean to be human? What if the price of saving humanity is giving up your own? We stand upon the precipice of extinction.The invading Metigen armada has decimated a third of settled space, leaving millions dead. Determined to save civilization, Earth & Seneca put aside their differences to face the threat together. But it may not be enough to stop the fleet of colossal dreadnoughts inhabited by advanced AIs. Alex Solovy & Caleb Marano hold the key to defeating the invaders. Now they face a deadly gauntlet of relentless alien hunters & assassins sent to kill them before they can unleash a potent new weapon. They will risk everything in a bid to save the human race-even if it means they can't save each other. The lines blur between man and machine, ally and enemy, and soldier and civilian. In a final stand against an ancient, powerful foe intent on eradicating it from the universe, humanity comes face to face with its destiny.

This companion explores ANT as an intellectual practice, tracking its movements and engagements with a wide range of other academic and activist projects. Showcasing the work of a diverse set of 'second generation' ANT scholars from around the world, it highlights the exciting depth and breadth of contemporary ANT and its future possibilities. The companion has 38 chapters, each answering a key question about ANT and its capacities. Early chapters explore ANT as an intellectual practice and highlight ANT's dialogues with other fields and key theorists. Others open critical, provocative discussions of its limitations. Later sections explore how ANT has been developed in a range of social scientific fields and how it has been used to explore a wide range of scales and sites. Chapters in the final section discuss ANT's involvement in 'real world' endeavours such as disability and environmental activism, and even running a Chilean hospital. Each chapter contains an overview of relevant work and introduces original examples and ideas from the authors' recent research. The chapters orient readers in rich, complex fields and can be read in any order or combination. Throughout the volume, authors mobilise ANT to explore and account for a range of exciting case studies: from wheelchair activism to parliamentary decision-making; from racial profiling to energy consumption monitoring; from queer sex to Korean cities. A comprehensive introduction by the editors explores the significance of ANT more broadly and provides an overview of the volume. The Routledge Companion to Actor-Network Theory will be an inspiring and lively companion to academics and advanced undergraduates and postgraduates from across many disciplines across the social sciences, including Sociology, Geography, Politics and Urban Studies, Environmental Studies and STS, and anyone wishing to engage with ANT, to understand what it has already been used to do and to imagine what it might do in the future.

Over 1,400 Pages of Sci-Fi Adventure **3rd trilogy in the Amaranthe series: includes Relativity, Rubicon, Requiem + the Re/Genesis short & an exclusive excerpt from the upcoming novel, Exin Ex Machina** Our universe is but a snowglobe--an experiment born of desperation and hope. The true universe is unfathomably vast, teeming with life and untold wonders. And it is enslaved. Created by ancient aliens in a daring gambit to understand the nature of the enemy, humanity is now asked to be the savior of a universe not their own. If they are to succeed, they must rise above not only their fractious past but the sins of their genetic ancestors to boldly embrace a future they never dared imagine possible. * RELATIVITY "I'd tell you to be careful, but we wouldn't be here if you'd ever taken that advice. No reason to start now, right?" For millennia the Anadens have ruled the known universe. They believe they've crafted the perfect empire, ordered and impervious to challenge. They believe the fight has been crushed out of the species they subjugate. They are wrong. It's a suicide mission, without a doubt. Alex Solovy and Caleb Marano must steal crucial intelligence from the Anadens' central military headquarters. To succeed, they'll need to navigate a strange universe ruled by a cabal of powerful immortals, populated by aliens they've never met and fueled by technology they've never seen. They're going to need a little help--the kind of help only a suicidally defiant anarchist on the run from more than just personal demons can provide. * RUBICON "We are you--the you that you could have been." The Anaden Directorate has ruled Amaranthe for millennia, subjugating species and galaxies in a neverending quest for control and order. For as many millennia, the anarchs have rebelled, defiantly claiming their own freedom yet without hope of winning it for everyone. Now, an alliance with humans offers a tantalizing chance to at last defeat their immortal masters. But can they trust an ally who looks suspiciously like the enemy? Humanity is the genetic recreation of the Anadens, but genetics aren't everything. Humans like to make their own destiny, and they have overcome great challenges to achieve unprecedented peace and prosperity. But have their trials prepared them for the enemy they now face? "The battle for the heart and soul of Amaranthe will be joined, and we must be unafraid." Amidst the chaos of an escalating war, Caleb's bond with the mysterious diati grows ever more powerful, even as Alex's forays into the hidden dimensions of the universe lead them to unfathomable places. But when the anarchs are pushed to the breaking point and the AEGIS fleet is dealt a devastating blow, Miriam Solovy must find a way to defeat a foe wielding superior technology, firepower and numbers, or else more than one civilization will be lost. * REQUIEM The end of the world began with a library query...how will it conclude? What began as a chance discovery of an anomalous signal is now a multiverse war between humanity and its genetic ancestors over who controls the levers of life and death. Over who decides what life is and whether it will be allowed to exist. For the ruling Anaden Directorate, victory means immortality. For humanity, defeat means extinction. On the heels of a breakthrough in wormhole technology, AEGIS and the anarchs enjoy the upper hand in the war. But their escalation pushes the Directorate to the brink, and now it will stop at nothing to destroy its enemy. In the thrilling finale of Aurora Rhapsody, events rush headlong toward an explosive conclusion that will decide the fate of civilizations, and only the victor is making it out the other side.

From a New York Times bestselling author comes a sexy, paranormal "rough-and-tumble adventure" (Library Journal) about a high-stakes romance between two shifters fighting for their lives. Cougar shifter Abby Carter always plays it safe. That's why she's an accountant--no excitement, no danger, and no cocky alpha males. She loves her quiet life, but fate has other plans. When Abby uncovers the shady dealings of an anti-shifter organization, she'll have to trust the too-sexy-for-her-peace-of-mind werewolf Declan Reed...or end up six feet under. Declan Reed is starting over. After two years with Shifter Operations Command, it's time to put his past behind him. Now Declan is the only thing standing between the gorgeous Abby and an early grave, and if he's going to have any chance of keeping her alive, he'll have to embrace the darkness he's fought to keep at bay. But first he has to convince Abby that there's no safer place in the world than the arms of a big bad werewolf. "Celia Kyle's my go-to for sexy alpha shifters and fast-paced, delicious storylines." -- Jessica Clare. New York Times and USA Today bestselling author

"Non-stop action and a hero to die for!"—Alexandra Ivy "Fast-paced romance...very compelling. Highly recommended."—Library Journal Alexandra Monzelle is a hard-fighting, heat-packing Seattle vice cop, and she's not much interested in being protected. Her short skirt and sex-kitten heels are tools to lure her suspects into talking about the deadly new drug hitting the streets. She can take care of herself and then some. Unfortunately, she can't seem to get that through to Kellach Dunne. Kellach is a fresh import from Dublin, and he's landed at the heart of a vicious motorcycle club that deals in guns, narcotics, and mayhem. He's all male, all rough power—and all interference in her damn investigation. Maybe he's one of the good guys. Maybe not. Lex knows an affair with an immortal like him would risk everything. No matter how delicious he looks... "Hot and fast from beginning to end."—Kate Douglas on Fated "Sizzling sex scenes and a memorable cast."—Publishers Weekly on Claimed "A fast-paced, excitement-filled explosion of action... Zanetti keeps getting better."-- RT Book Reviews on Marked, 4.5 Stars Top Pick

Reassesses the tradition and individual works of Western romance, from ancient Greece to the present, as constituting an imaginative universe in which man, moving between the idyllic and demonic, functions as a scriptural hero.
