2001 Nights is hard science fiction done right. Its interconnected stories are endlessly creative, painting a picture of a future that seems both fantastic and realistic. The universe that Hoshino constructs isn't just the best in manga sci-fi, but one of the best in science fiction in general.

A stunning cycle of seven science fiction tales in the cold reaches of outer space.

This lively book takes us back to the first performances of five famous musical compositions: Monteverdi's Orfeo in 1607, Handel's Messiah in 1742, Beethoven's Ninth Symphony in 1824, Berlioz's Symphonie fantastique in 1830, and Stravinsky's Sacre du printemps in 1913. Thomas Forrest Kelly sets the scene for each of these premieres, describing the cities in which they took place, the concert halls, audiences, conductors, and musicians, the sound of the music when it was first performed (often with instruments now extinct), and the popular and critical responses. He explores how performance styles and conditions have changed over the centuries and what music can reveal about the societies that produce it. Kelly tells us, for example, that Handel recruited musicians he didn't know to perform Messiah in a newly built hall in Dublin; that Beethoven's Ninth Symphony was performed with a mixture of professional and amateur musicians after only three rehearsals; and that Berlioz was still buying strings for the violas and mutes for the violins on the day his symphony was first played. Kelly's narrative, which is enhanced by extracts from contemporary letters, press reports, account books, and other sources, as well as by a rich selection of illustrations, gives us a fresh appreciation of these five masterworks, encouraging us to sort out our own late twentieth-century expectations from what is inherent in the music.

More than twenty-five stories of horror and nightmarish fantasy transform everyday situations into experiences of compelling terror in the worlds of the living, the dying, and the nonliving.

A celebration of the charm and sophistication of a bygone era, this lavishly illustrated book examines the history of the nightclubs, from their ascension during the 1920s through to today's revival. Includes anecdotes about stars, behind-the-scenes stories, and more. 125 full-color illustrations.

From the author of the best-selling memoir *An Unquiet Mind*, comes the first major book in a quarter century on suicide, and its terrible pull on the young in particular. *Night Falls Fast* is tragically timely: suicide has become one of the most common killers of Americans between the ages of fifteen and forty-five. An internationally acknowledged authority on depressive illnesses, Dr. Jamison has also known suicide firsthand: after years of struggling with manic-depression, she tried at age twenty-eight to kill herself. Weaving together a historical and scientific exploration of the subject with personal essays on individual suicides, she brings not only her remarkable compassion and literary skill but also all of her knowledge and research to bear on this devastating problem. This is a book that helps us to understand the suicidal mind, to recognize and come to the aid of those at risk, and to comprehend the profound effects on those left behind. It is critical reading for parents, educators, and anyone wanting to understand this tragic epidemic.
