# Management User Manual

The use of  
Electronic Health  
Records

(EHR)/Electronic  
Medical Records  
(EMR) data is  
becoming more  
prevalent for  
research. However,  
analysis of this  
type of data has  
many unique  
complications due

# Access Free Allscripts

Practice Management  
User Manual

to how they are collected, processed and types of questions that can be answered. This book covers many important topics related to using EHR/EMR data for research including data extraction, cleaning, processing,

# Access Free Allscripts

Practice  
Management  
User Manual

analysis, inference,  
and predictions  
based on many  
years of practical  
experience of the  
authors. The book  
carefully evaluates  
and compares the  
standard statistical  
models and  
approaches with  
those of machine  
learning and deep  
learning methods

# Access Free Allscripts

Practice Management  
User Manual

and reports the unbiased comparison results for these methods in predicting clinical outcomes based on the EHR data. Key Features:  
Written based on hands-on experience of contributors from multidisciplinary EHR research

# Access Free Allscripts

Practice Management  
User Manual

projects, which include methods and approaches from statistics, computing, informatics, data science and clinical /epidemiological domains.

Documents the detailed experience on EHR data extraction, cleaning and

# Access Free Allscripts

Preparation

Provides a broad view of statistical approaches and machine learning prediction models to deal with the challenges and limitations of EHR data. Considers the complete cycle of EHR data analysis. The use of EHR/EMR analysis

# Access Free Allscripts

requires close collaborations between statisticians, informaticians, data scientists and clinical/epidemiological investigators. This book reflects that multidisciplinary perspective.
