When you think of astrology, you may think of the horoscope section in your local paper, or of Nancy Reagan's consultations with an astrologer in the White House in the 1980s. Yet almost every religion uses some form of astrology: some way of thinking about the sun, moon, stars, and planets and how they hold significance for human lives on earth. Astrology and Cosmology in the World's Religions offers an accessible overview of the astrologies of the world's religions, placing them into context within theories of how the wider universe came into being and operates. Campion traces beliefs about the heavens among peoples ranging from ancient Egypt and China, to Australia and Polynesia, and India and the Islamic world. Addressing each religion in a separate chapter, Campion outlines how, by observing the celestial bodies, people have engaged with the divine, managed the future, and attempted to understand events here on earth. This fascinating text offers a unique way to delve into comparative religions and will also appeal to those intrigued by New Age topics.

A holistic introduction to the core concepts of astrology, this book reveals the symbolic connections and mysterious relationships that underpin not just our connection to the stars but also magic, herbalism, and alchemy. This new, yet ancient retelling of astrology reclaims a view of holistic, interconnected astrology from the ancient Greeks, Mesopotamians, and Egyptians - how astrology was originally intended, before the worldview that came about as a result of the Industrial Revolution. It enables those new to astrology to reconnect with the wonder and magic of nature and the stars and offers a different perspective to those familiar with Western astrology.

Journey into the cosmos with cosmology and metaphysics. Cosmic Astrology: The Book of Answers opens a world of ancient and modern thought, where microcosm meets macrocosm. From the fractal symmetry that defines the sacred geometry of the natural world to the celestial bodies that shift like clockwork in the sky, explore the subtle rhythms that connect all motion. Unearth tales of ancient esoterica in harmony with the psychology and physics of great modern minds like Jung and Einstein. Within its pages, the dimensional reality begins to unfold the shapes of Plato's classical elements, and the trace of sacred symmetry resounds the golden ratio in da Vinci's "'Vitruvian Man.'" East meets West as Tao is expressed and scientific method is challenged. Time turns back the clocks of the stars, as astrological aspects paint the story of the ages in the sky.

In the Middle Ages, Astronomia - one of the Seven Liberal Arts - was as much about astrology as astronomy. In fact the two disciplines only parted company in the seventeenth century, as the materialistic world-view gained greater prominence. Where once human destiny was connected to stars and planets, and spiritual or soul qualities were associated with the natural world, now the cosmos was seen as consisting of gases, fire and dead rock. Rudolf Steiner brings a new spiritual perspective to our study of the heavens. Humanity, he says, is intimately connected to cosmic beings, who in turn are related to planets and stars. There is meaning in the cosmos. Although Steiner rejects the simplistic notion of the planets determining our lives and behaviour, he makes a clear connection between the heavenly bodies and human beings. Whilst criticizing the superficial nature of much astrology, Steiner shows that as individuals, and with the guidance of spiritual beings, we choose an appropriate time of birth to match the destiny we are to live. This enlightening anthology, expertly collated by Margaret Jonas, features excerpts of Steiner's work on the spiritual individualities of the planets, the determination of human characteristics by the constellation at birth, the cultural epochs and the passage of the equinox, cosmic influences on the individual and humanity, life in the planetary spheres between death and rebirth, solar and lunar eclipses, comets, and much more.
