Forget the 10,000 hour rule— what if it 's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What 's on your list? What 's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don 't have and effort you can 't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That 's why it 's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It 's so much easier to watch TV or surf the web. . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you 'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You 'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like. what you 're trying to achieve, and what you 'll be able to do when you 're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it 's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you 're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time. . . and have more fun along the way.

The Blue Book of Grammar and Punctuation is filled with easy-to-understand rules,real-world examples, dozens of reproducible exercises, and pre- and post-tests. This handy workbook is ideal for teachers, students in middle school through college, ESL students, homeschoolers, and professionals. Valuable for anyone who takes tests or writes reports, letters, Web pages, e-mails, or blogs, *The Blue Book* offers instant answers to everyday English usage questions.

Cognitive, affective and drama activities for EFL students This resource book for teachers contains an exciting collection of activities which present and practise vital grammatical content in an original way. Each game is clearly introduced with a summary specifying the area of grammar to be practised, the level it is aimed at, the time required and the material needed. The activity is then presented using a step-by-step approach.

Collins Easy Learning How to Use English is designed to help learners of all ages use individual words correctly, and choose the right words and structures for the meaning they want to convey. With its clear layout and simple explanations, this book is ideal for learners of English who want to improve their English for work, study, and travel.

David Crystal's classic *English as a Global Language* considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Manu Gandhi, M.K. Gandhi 's grand-niece, joined him in 1943 at the age of fifteen. An aide to Gandhi 's ailing wife Kasturba in the Aga Khan Palace prison in Pune, Manu remained with him until his assassination. She was a partner in his final *yajna*, an experiment in Brahmacharya, and his invocation of Rama at the moment of his death. Spanning two volumes, *The Diary of Manu Gandhi* is a record of her life and times with M.K. Gandhi between 1943 and 1948. Authenticated by Gandhi himself, the meticulous and intimate entries in the diary throw light on Gandhi 's life as a prisoner and his endeavour to establish the possibility of collective non-violence. They also offer a glimpse into his ideological conflicts, his efforts to find his voice, and his lonely pilgrimage to Noakhali during the riots of 1946. The first volume (1943 – 44) chronicles the spiritual and educational pursuits of an adolescent woman who takes up writing as a mode of self-examination. The author shares a moving portrait of Kasturba Gandhi 's illness and death and also unravels the deep emotional bond she develops with Gandhi, whom she calls her 'mother'.

What are our obligations to others as people in a free society? Should government tax the rich to help the poor? Is the free market fair? Is it sometimes wrong to tell the truth? Is killing sometimes morally required? Is it possible, or desirable, to legislate morality? Do individual rights and the common good conflict? Michael J. Sandel's 'Justice' course is one of the most popular and influential at Harvard. Up to a thousand students pack the campus theater to hear Sandel relate the big questions of political philosophy to the most vexing issues of the day, and this fall, public television will air a series based on the course. Justice offers readers the same exhilarating journey that captivates Harvard students. This book is a searching, lyrical exploration of the meaning of justice, one that invites readers of all political persuasions to consider familiar controversies in fresh and illuminating ways. Affirmative action, same-sex marriage, physician-assisted suicide, abortion, national service, patriotism and dissent, the moral limits of markets—Sandel dramatizes the challenge of thinking through these conflicts, and shows how a surer grasp of philosophy can help us make sense of politics, morality, and our own convictions as well. Justice is lively, thought-provoking, and wise—an essential new addition to the small shelf of books that speak convincingly to the hard questions of our civic life.

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, *Fluent in 3 Months*. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. *Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World* is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

It's the end of chocolate - for good! At least, that's what they're saying on TV. Eleven-year-old Jelly is horrified, but a trail of clues leads to a posh chocolate shop and its suspicious owner, the dastardly Garibaldi Chocolati. Is it really the choccopocalypse, or is there a choccoplot afoot?
