Transportation accounts for approximately 25 percent of total U.S. energy consumption and about 60 percent of U.S. petroleum consumption. Practically all of this energy is in the form of petroleum products with very minor amounts of electric energy and natural gas. Thus, the transportation sector is very important in analyses of energy demand and the potential for energy conservation.

We gratefully acknowledge the financial support of COST (European Cooperation in Science and Technology), funded by the Horizon 2020 Framework Programme of the European Union. Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability, and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way, and with the highest scientific standards.The work builds on the existing knowledge in Descriptive Linguistics, but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address, and the accompanying Manual with the relevant background information (definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references). The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary.The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

Now considered a dysfunctional mess, Chicago's public housing projects once had long waiting lists of would-be residents hoping to leave the slums behind. So what went wrong? To answer this complicated question, D. Bradford Hunt traces public housing's history in Chicago from its New Deal roots through current mayor Richard M. Daley's Plan for Transformation. In the process, he chronicles the Chicago Housing Authority's own transformation from the city's most progressive government agency to its largest slumlord. Challenging explanations that attribute the projects' decline primarily to racial discrimination and real estate interests, Hunt argues that well-intentioned but misguided policy decisions—ranging from design choices to maintenance contracts—also paved the road to failure. Moreover, administrators who fully understood the potential drawbacks did not try to halt such deeply flawed projects as Cabrini-Green and the Robert Taylor Homes. These massive high-rise complexes housed unprecedented numbers of children but relatively few adults, engendering disorder that pushed out the working class and, consequently, the rents needed to maintain the buildings. The resulting combination of fiscal crisis, managerial incompetence, and social unrest plunged the CHA into a quagmire from which it is still struggling to emerge. Blueprint for Disaster, then,is an urgent reminder of the havoc poorly conceived policy can wreak on our most vulnerable citizens.
