Bridges Out of Poverty uses the lens of economic class and provides concrete tools and strategies for a community to alleviate poverty. Participants will review poverty research, examine a theory of change, and analyze poverty through the prism of the hidden rules of class, resources, family structure, and language.

"...If your business, agency, or organization works with people from poverty, only a deeper understanding of their challenges-and strengths-will help you partner with them to create opportunities for success. Bridges Out of Poverty is a unique and powerful tool designed specifically for social, health, and legal services professionals. Based in part on Dr. Ruby K. Payne's myth shattering A Framework for Understanding Poverty, Bridges reaches out to the millions of service providers and businesses whose daily work connects them with the lives of people in poverty. In a highly readable format you'll find case studies, detailed analysis, helpful charts and exercises, and specific solutions you and your organization can implement right now to: redesign programs to better serve people you work with; build skill sets for management to help guide employees; upgrade training for front-line staff like receptionists, case workers, and managers; improve treatment outcomes in health care and behavioral health care; increase the likelihood of moving from welfare to work" -- BACK COVER.

The 5th edition features an enhanced chapter on instruction and achievement; greater emphasis on the thinking, community, and learning patterns involved in breaking out of poverty; plentiful citations, new case studies, and data: more details findings about interventions, resources, and causes of poverty, and a review of the outlook for people in poverty---and those who work with them.

Fully engage learners in your classroom. Discover how to create high-quality assessments using a five-phase design protocol. Explore types and traits of quality assessment, and learn how to develop

assessments that are innovative, effective, and engaging.

Challenges Ruby Payne's theories about the impact of class differences and economics on teaching and learning, putting forward other factors as better predictors of student performance. Kunjufu points to success stories in schools that serve low-income students. His refutation of Payne's popular teacher-training program asserts that teacher expectations, time on task, and the principal's leadership are the main factors in determining educational outcomes at a school. Abandoning Payne's framework of teacher-student income disparities, racial makeup, and per-pupil expenditure, this critical analysis asserts the human component as the most powerful tool for improving education in failing schools. --From publisher description.
