Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

This leading text in the field provides a comprehensive assessment of the nature, extent and dimensions of international population movements and of their consequences. Thoroughly revised and updated, the 5th edition assesses the impact of the global economic crisis for migration and includes new material on climate change and migration.

Confusion about governance abounds. Many lack appreciation of how different traditions of thought in the social sciences contribute to our understanding. This book tackles these weaknesses head on and aims to provide a wider vision of the area, examining three critical areas of practice: environmental, corporate and participatory governance.

Pulitzer Prize-winning journalist Daniel Golden exposes how academia has become the center of foreign and domestic espionage—and why that is troubling news for our nation's security. Grounded in extensive research and reporting, *Spy Schools* reveals how academia has emerged as a frontline in the global spy game. In a knowledge-based economy, universities are repositories of valuable information and research, where brilliant minds of all nationalities mingle freely with few questions asked. Intelligence

agencies have always recruited bright undergraduates, but now, in an era when espionage increasingly requires specialized scientific or technological expertise, they're wooing higher-level academics—not just as analysts, but also for clandestine operations. Golden uncovers unbelievable campus activity—from the CIA placing agents undercover in Harvard Kennedy School classes and staging academic conferences to persuade Iranian nuclear scientists to defect, to a Chinese graduate student at Duke University stealing research for an invisibility cloak, and a tiny liberal arts college in Marietta, Ohio, exchanging faculty with China's most notorious spy school. He shows how relentlessly and ruthlessly this practice has permeated our culture, not just inside the US, but internationally as well. Golden, acclaimed author of *The Price of Admission*, blows the lid off this secret culture of espionage and its consequences at home and abroad.

A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.

It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.
