On July 4, 1776, the United States declared itself a free and independent nation. Two weeks later, the Continental Congress began working on the Articles of Confederation to create a government for the new country. By 1787 that government was found to be ineffective. A convention was called to amend the articles. The delegates quickly realized amendment wasn't enough, a new type of government had to be created. The result of their deliberations was the Constitution of the United States, ratified in 1789. The First Congress proposed ten amendments, known as the Bill of Rights. Over the next 210 years there were seventeen more amendments. This book will help you to read, study and understand the founding documents of our nation as well as the rights and responsibilities of our government and citizens.

The United States of America has been blessed with the world's greatest political success formula. In a little over a century, this formula allowed a small segment of the human family—less than 6 percent—to become the richest nation on earth. It allowed them to create more than half of the world's total output in production and enjoy the highest standard of living in the history of the world. In this book, we learn how the Founding Fathers discovered this success formula. Much of this discovery is told in the words of the Founders themselves, so that the reader can feel the power of their minds sweeping away thousands of years of bad government and illogical laws to formulate a whole new society based on human freedom. By returning to the roots of the Founders' thinking, and contemplating the logic that they used in establishing the Constitution, we can better understand the challenges and solutions that confront us in today's political world. This eBook includes the original index, illustrations, footnotes, table of contents and page numbering from the printed format.
