computer linked through transmission media. Through the network, we can transmit the data signal from one point to another. 5. A large community support provides by computer network and extensive documentation libraries.

~~Difference Between Computer Network~~

# Download Free Data Communication And Networking By Behrouz A

Switching techniques are used for transmitting data across networks.

Different types are : 1. Circuit Switching:

In the Circuit Switching technique, first, the complete end-to-end transmission path between the source and the destination computers is established and then the

# Download Free Data Communication And

message is transmitted through the path.  
The main advantage of this technique is  
guaranteed delivery of the message.
