Disputers of the Tao is both a historical survey of Chinese philosophy during its golden age (about 500-200 BCE) and an innovative comparative work which draws connections to the West's many philosophical traditions. The topic is thoroughly and lucidly handled, succeeding as both an introduction for non-specialists and a touchstone for anyone currently working in the field.

First published in the late 80's, "Disputers of the Tao" might seem a tad old school with its Wade-Giles transliteration, and recent archaeological discoveries may have tweaked a few of the author's chronological arrangements (which, as he himself reminds us, are tentative and convenient impositions), but on the whole the details and the insights hold up just fine, and these plus the helpfully memorable framework holding it all together (all invaluable in their own right, of course) handily ...

A. C. Graham's "Disputers of the Tao" is an excellent introduction to pre-Qin philosophical argumentation. I would highly recommend it for personal study; it would serve well as a textbook for an advanced-level seminar in Chinese thought.

Disputers of the Tao is both a historical survey of Chinese philosophy during its golden age about BCE and an innovative comparative work which draws connections to the West ' s many philosophical traditions. For anyone interested in the affinities between ancient Chinese and modern Western philosophy, there is no better introduction.

"A history of Chinese philosophy in the so-called Axial Period (the period of classical Greek and Indian philosophy), during which time China evolved the characteristic ways of thought that sustained both its empire and its culture for over 2000 years. It is comprehensive, lucid, almost simple in its presentation, yet backed up with incomparable authority amid a well-honed discretion that unerringly picks out the core of any theme. Garlanded with tributes even before publication, it has redrawn the map of its subject and will be the one essential guide for any future exploration. For anyone interested in the affinities between ancient Chinese and modern Western philosophy, there is no better introduction" —Contemporary Review "The book is an expression of first-rate scholarship, filled with deep insights into classical Chinese thought. At the same time, it provides a comprehensive and well-balanced discussion that is accessible to the general reader. It is the rare kind of book that will be used as a standard text in introductory courses and be regularly consulted and cited by specialists working in the field." —Philosophical Review "For those who will read only one book on Chinese philosophy, A. C. Graham's Disputers of the Tao is it." —Journal of the History of Philosophy A. C. Graham (1919 – 1991) is considered by many to have been the leading world authority on Chinese thought, grammar, and textual criticism and the greatest translator of Chinese since Waley. He taught at the School of Oriental and African Studies, London University (where he was Professor of Classical Chinese until 1988) Yale, Ann Arbor, Tsing Hua, Brown, and Honolulu. He was a Fellow of the British Academy. His numerous works include Two Chinese Philosophers (1958), Poems of the Late T'ang (1965), Chuang-tzu: the Seven Inner Chapters (1981), and Studies in Chinese Philosophical Literature (1986).

Describes the classical age of Chinese philosophy (500-200 B.C.) that coincides with the final decline of the Chou empire and the period of 'warring states' (403-221 B.C.), an exceptional era in Chinese history when there was no central authority which could claim to rule the entire civilized world. In the absence of a single unified state power enforcing conformity, there blossomed a hundred schools of thought. Philosophical argument and rational debate flourished in China as never before or since.

Graham addresses several fundamental problems in classical Chinese philosophy, and in the nature and structure of the classical Chinese language. These inquiries and reflections are both broad based and detailed. Two sources of continuity bring these seemingly disparate parts into a coherent and intelligible whole. First, Graham addresses that set of fundamental philosophical questions that have been the focus of dispute in the tradition, and that have defined its character: What is the nature of human nature? What can we through linguistic and philosophical scrutiny discover about the date and composition of some of the major texts? What sense can we make of the Kung-sun Lung sophistries? A second source of coherence is Graham's identification and articulation of those basic and often unconscious presuppositions that ground our own tradition. By so doing, he enables readers to break free from the limits of their own conceptual universe and to explore in the Chinese experience a profoundly different world view.

-- Burton Watson

This ambitious book presents a new interpretation of Chinese thought guided both by a philosopher's sense of mystery and by a sound philosophical theory of meaning. That dual goal, Hansen argues, requires a unified translation theory. It must provide a single coherent account of the issues that motivated both the recently untangled Chinese linguistic analysis and the familiar moral-political disputes. Hansen's unified approach uncovers a philosophical sophistication in Daoism that traditional accounts have overlooked.

Examines the issues of self (including gender), truth, and transcendence in classical Chinese and Western philosophy.

Scholars of both religion and philosophy have contributed essays exploring the thought of Xunzi, traditionally identified as the third philosopher in the Confucian tradition. An introduction provides historical and philosophical context for Xunzi and his works, and the articles cover such topics as virtue, moral agency, and theories of human nature. The Dao De Jing represents one of the most important works of Chinese philosophy, in which the author, Lao Zi (c. 580-500 BC), lays the foundations of Taoism. Composed of 81 short sections, the text itself is written in a poetic style that

is ambiguous and challenging for the modern reader. Yet while its meaning may be obscure, the text displays the originality of Lao Zi's wisdom and remains a hugely influential work to this day. In *Reading the Dao: A Thematic Inquiry*, Wang Keping offers a clear and accessible guide to this hugely important text. Wang's thematic approach opens up key elements of the *Dao De Jing* in a way that highlights and clarifies the central arguments for the modern reader. Presenting comprehensive textual analysis of key passages and a useful survey of recent Taoist scholarship, the book provides the reader with an insight into the origins of Taoist philosophy. This is the ideal companion to the study of this classic Taoist text.

Thinking Through Confucius critically interprets the conceptual structure underlying Confucius' philosophical reflections. It also investigates "thinking," or "philosophy" from the perspective of Confucius. That authors suggest that an examination of Chinese philosophy may provide an alternative definition of philosophy that can be used to address some of the pressing issues of the Western cultural tradition.

This a general account of the school of Mo-tzu, its social basis as a movement of craftsmen, its isolated place in the Chinese tradition, and the nature of its later contributions to logic, ethics, and science. It assesses the relation of Mohist thinking to the structure of the Chinese language, and grapples with the textual dynamics of later Mohist writings, particularly in regard to grammar and style, technical terminology, the use and significance of stock examples, and overall organization. Includes edited and annotated Chinese text with an English translation and commentary, a glossary, and a photographic reproduction of the unemended text from the *Taoist Patrology*.
