Edition, this practical workbook offers a wide variety of exercises including situation-based questions, film critique questions, laboratory activities, and self-evaluation tests. A wide variety of exercises include questions on anatomy, positioning critique, and image evaluation, with answers at the end of the workbook. Chapter competencies are formatted as a set of tasks that you should be able to perform after working through the material. Situational questions describe clinical scenarios, then ask you to apply your knowledge to real-life examples. Film critique questions prepare you to evaluate the quality of radiographs and ask what positioning corrections need to be made to improve the image. Laboratory exercises provide hands-on experience as you perform radiographs using phantoms, evaluate the images, and

testing experience you'll encounter when you take the CPC® exam. Concise outline format helps you quickly access key information and study more efficiently. NEW! Real-world, physician-based coding cases provide extra practice and preparation for the CPC exam.

This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated
