"I was hungry and you gave me no food, I was thirsty and you gave me no drink, I was a stranger and you did not welcome me, naked and you did not clothe me, sick and in prison and you did not visit me."? Matthew 25:42-43 ESV In many Bibles, Christ's words are set apart with a red font. It should be obvious, but this distinction helps remind us that when God becomes Man and that Man speaks—it's probably something we cannot afford to miss. So why doesn't the church take these "red letters" to heart? Why aren't we doing more to be Christ's hands and feet to the poor, the disenfranchised, the weary, the ill, the fatherless, the prisoners? It's all there—in red letters. Why has the Church shirked its responsibilities, leaving the work to be done by governments, rock stars, and celebrities? The Gospel wasn't only meant to be read—it was meant to be lived. From the HIV crisis in Africa to a single abused and lonely child in Russia, the Church must seize the opportunity to serve with a radical, reckless abandon. Author Tom Davis offers both challenge and encouragement to get involved in an increasingly interconnected, desperate modern world.

Glaciers and Glaciation is the classic textbook for all students of glaciation. Stimulating and accessible, it has established a reputation as a comprehensive and essential resource. In this new edition, the text, references and illustrations have been thoroughly updated to give today's reader an up-to-the minute overview of the nature, origin and behaviour of glaciers and the geological and geomorphological evidence for their past history on earth. The first part of the book investigates the processes involved in forming glacier ice, the nature of glacier-climate relationships, the mechanisms of glacier flow and the interactions of glaciers with other natural systems such as rivers, lakes and oceans. In the second part, the emphasis moves to landforms and sediment, the interpretation of the earth's glacial legacy and the reconstruction of glacial depositional environments and palaeoglaciology.
