From the successful team of Larson, Hostetler, and Edwards comes a new text carefully developed for one-year courses that combine and integrate material from Precalculus through Calculus I. This text is ideal for instructors who wish to successfully bring students up to speed algebraically within precalculus and transition them into calculus.

With the same design and feature sets as the market leading Precalculus, 7/e, this new addition to the Larson/Hostetler Precalculus series provides both students and instructors with sound, consistently structured explanations of the mathematical concepts. Designed for a two-term course, this text contains the features that have made Precalculus a complete solution for both students and instructors: interesting applications, cutting-edge design, and innovative technology combined with an abundance of carefully written exercises. In addition to a brief algebra review and the core precalculus topics, Precalculus with Limits covers analytic geometry in three dimensions and introduces concepts covered in calculus.
