Revised edition of the IGCSE Mathematics Core and Extended Coursebook for the 0580 syllabus for examination from 2015.

The number of English-medium international schools that deliver their curriculum wholly or partly in the English language reportedly reached 6,000 in January 2012. It is anticipated this number will rise to over 11,000 schools by 2022,

Employing over 500,000 English-speaking teachers. The number of children being taught in these schools reportedly reached 3 million in March 2012. Alongside this phenomenal growth the landscape of international schooling has changed fundamentally, moving away from largely serving the children of the expat and globally mobile business community and Embassies, towards serving the 'local' children of the wealthy and emerging middle-class. This has been reflected in the shift away from non-profit ownership by the school community towards ownership by for-profit companies and proprietors. In this book, Tristan Bunnell explores the changing landscape of international

Schooling and discusses the implications of these changes, both in terms of theoretically conceptualizing the scale, nature and purpose of the field, and in terms of practically serving and administering the growing industry that international education is becoming. The Changing Landscape of International Schooling will be worthwhile reading for researchers, academics and students of international schooling, leaders and teachers in international schools, and those interested in the broader development of international education.

in English contains work by more than 100 poets from all parts of the English speaking world.

The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key contemporary developments, including: internationalism in the context of

government's educational policy, the ' Education for All Policy ' was launched as a stepping stone to free quality education. However, inequities have become widely pronounced within the Namibian educational system. Democracy and Education in Namibia and beyond debates the education – democracy nexus in Namibia and the southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and limitations of education as an instrument of social change and question whether or not the

Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond, and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis, especially in South Africa where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire, this book gives scholarly insight into the history and social conditions that gave rise to our current predicament.
