Develop the Skills to Learn Anything Faster, Easier, and More Effectively Written by the creators of the #1 bestselling course of the same name, this book will teach you how to "hack" your learning, reading, and memory skills, empowering you to learn everything faster and more effectively. What Would You Do If You Could Learn Anything 3 Times Faster? In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. This Book Will Teach You 3 Major Skills: Speed reading with high (80%+) comprehension and understanding Memory techniques for storing and recalling vast amounts of information quickly and accurately Developing the cognitive infrastructure to support this flood of new information long-term However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. Anyone Can Develop Super-Learning Skills This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. "This book should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look

no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion
