Created in Paris in 1973, Architecture Studio today integrates the work of seven associate architects, architects, city planners, engineers and interior designers of various nationalities. The group has an open-door policy and has grown bigger with the

In this highly original study, Nuccio Ordine uses the figure of the ass as a lens through which to focus on the thought and writings of the great Renaissance humanist philosopher Giordano Bruno. The donkey played a prominent role as a symbol in sixteenth-century literature, and the ass and human asininity became a recurring motif in Bruno's writings. Ordine offers the first analysis of Bruno's use of this complex symbol, which encompasses contradictory characteristics ranging from humble and hardworking to ignorant and idle. The result is a deeper understanding of Bruno the philosopher, along with a stronger appreciation of Bruno the literary artist. Ordine looks especially closely at Bruno's use of the figure of the donkey in his attacks on the theologies of both the Reformation and the Counter-Reformation, and in issues that have become modernist concerns. Ordine's analysis sheds light on each of the major themes of Bruno's philosophy: science and knowledge, myth and religion, language and literature.

The rise of the mendicant orders in the later Middle Ages coincided with rapid and dramatic shifts in the visual arts. The mendicants were prolific patrons, relying on artworks to instruct and impress their diverse lay congregations. Churches and chapels were built, and new images and iconographies developed to propagate mendicant cults. But how should the two phenomena be related? How much were these orders actively responsible for artistic change, and how much did they simply benefit from it? To explore these questions, Art and the Augustinian Order in Early Renaissance Italy looks at art in the formative period of the Augustinian Hermits, an order with a particularly difficult relation to art. As a first detailed study of visual culture in the Augustinian order, this book will be a basic resource, making available previously inaccessible material, discussing both well-known and more neglected artworks, and engaging with fundamental methodological questions for pre-modern art and church history, from the creation of religious iconographies to the role of gender in art.

Dirk Jan Postel is an architect complementing the mainstream of Dutch architects known as the 'Superdutch' architects. This book examines architectural realism by emphasizing the importance of authenticity, meaning, materials, space and emptiness. Dirk Jan Postel's work illustrates the daily activities of a professional office in a struggle with artistic autonomy. The book explores important and contemporary design themes, in a direct juxtaposition of modern architecture within the existing urban fabric, or the themes of tradition side-by-side with modernity.
