This is a book of hypothetical cases written to give students real examples of key finance concepts. Each case is 3-4 pages in length, and concludes with questions and problems that walk students through calculations and critical analysis of the case to help them make business decisions.

Loved by instructors for its visual and flexible way to build computer skills, the Illustrated Series is ideal for teaching Microsoft Office Access 2010 to both computer rookies and hotshots. Each two-page spread focuses on a single skill, making information easy to follow and absorb. Large, full-color illustrations represent how the students' screen should look. Concise text introduces the basic principles of the lesson and integrates a case study for further application. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Cybercrime Case Presentation is a "first look" excerpt from Brett Shavers' new Syngress book, Placing the Suspect Behind the Keyboard. Case presentation requires the skills of a good forensic examiner and great public speaker in order to convey enough information to an audience for the audience to place the suspect behind the keyboard. Using a variety of visual aids, demonstrative methods, and analogies, investigators can effectively create an environment where the audience fully understands complex technical information and activity in a chronological fashion, as if they observed the case as it happened.

Examines the central role that auto production and consumption have played in the twentieth century: as a technological system with major impacts on public policy, land use, cultural patterns, social relations, community, natural resources, environmental quality, and options for spatial mobility.

Our Cosmic Ancestors is a dynamic work unraveling the messages of these 'universal astronauts' and decoding the symbols and visual mathematics they have left for us in the Egyptian Pyramids, Stonehenge, the Mayan calendar, the Maltese Cross and the Sumerian zodiac. The book is captivating reading from beginning to end. However Mr. Chatelain's purpose in sharing these exciting discoveries lies in the hope that all humans will extend their horizons, to release fear of the unknown just enough that another generation will exhibit growing curiosity to continue the search for signs of purposeful nurturing of this planet.

Teaching is as much about students as it is about curriculum, and no one understands this better than middle and high school teachers. But even the most dedicated teacher can sometimes feel defeated by the challenge of reaching distracted, disconnected, and defiant adolescents. Drawing on her own experience as a high school teacher, Katy Ridnouer shares an approach to classroom management that will help you spend less time "dealing with" your adolescent learners and more time inspiring them to be their best selves in school and beyond. Managing with heart means accepting teenage students as they are and recognizing what they need: a connection with the curriculum; a sense of order; and most essentially, a sense that someone cares. In this book, you'll find practical strategies for * Balancing care and discipline * Interacting with students and their parents * Establishing classroom routines that keep students on task * Communicating expectations and ensuring accountability * Handling common challenges, from classroom noise and personality conflicts to inappropriate clothing and disrespectful language * Building trust and helping students feel emotionally and intellectually safe. Vivid, real-life examples and questions for reflection make this a perfect choice for faculty reading groups and any middle or high school teacher looking to create a positive learning community, enhance students' confidence and interpersonal skills, and rediscover the reward of being a teacher.

This start-to-finish guide enables even beginners to create beautiful beadwork based on authentic Native American designs. Step-by-step instructions include diagrams for 71 patterns for bead weaving and applique weaving.

Presenting new machine trapunto quilting patterns, as well as creative project ideas. Hari reviews the basic techniques for machine trapunto, and then the FUN begins! You'lllove the beautiful texture and dimensionthat machine trapunto adds to your quilts. All new designs and patterns. Teaches hand quilters how to use the basic machine trapunto technique.
