With a fleet of telescopes in space and giant observatories on the ground, professional astronomers produce hundreds of spectacular images of space every year. These colorful pictures have become infused into popular culture; we find them on billboards, in commercials, and on our computers. But they also invite questions: Is this what outer space really looks like? Are the colors real? How are these images made? "Coloring the Universe" uses accessible language to describe how these giant telescopes work, what scientists learn with them, and how they are used to make color images. Both informative and beautiful, this book is filled with brilliant images of deep space as well as an insider's perspective by the people who make them."

remind us that we are in control. To have the life you desire, all you have to do is ask. The secret to manifesting change is not focusing on the how but instead, the end result of what you're after—the kind of life you want. The beloved creator of Notes from the Universe distills a career's worth of inspiration into elegant, brief lessons for making our way through the world--conceived as a guidebook for his young daughter yet relevant to everyone who's living a life on earth. (In other words, everyone.) Mike Dooley returns with what he expects to be his most impactful book yet: a volume of elegant, brief lessons conceived as a message from a father to his daughter, and equally relevant to everyone who's living a life on earth. (In other words, everyone.) Mike is a beloved teacher and thought leader for seekers around the world, known for his trademark humor, wisdom, and sheer joy in living--all of which he's shared in his 17 books and his free daily e-mails of Notes from the Universe. His Beginner's Guide to the Universe, inspired by such classics of gem-like wisdom as Life's Little Instruction Book, The Four Agreements, and The Things You Can See Only When You Slow Down, gives voice to his most essential, heartfelt advice about living deliberately and creating consciously.
