"The Dental Board Busters ADEX/NERB is currently the only study guide available that comprehensively, but specifically covers the relevant material to pass the computerized diagnostic exam (CSE). Dental Board Busters is written by dental hygienists for dental hygienists."--From publisher description.

Guarantee you'll pass the ADEX/NERB with the Dental Board Busters Study Guides - The Dental Board Busters ADEX/NERB is currently the only study guide available that comprehensively, but specifically covers the relevant material to pass the dental board's computerized diagnostic exam (DSE). There are five parts to the exam, which our study guides will cover in their entirety: the Restorative, the Periodontal, the Prosthodontic, the Endodontic and the Diagnostic Skills Exam (DSE) Examinations. With 75% needed to pass, the Dental Board Busters textbook will give you the edge you need to far exceed minimum passing rates!

Offering the most realistic NBDHE review and practice available, Mosby's Review Questions for the National Board Dental Hygiene Examination includes both a print book and companion website to prepare you for exam success. In the book, you ' ll review with more than 1,250 Component A practice questions — with each answer including a rationale for both correct and incorrect answer options. Online, you can review the same questions plus an additional 420 case-based items related to Component B in 1) practice mode or 2) timed, exam-simulation mode with randomized tests that match the number and distribution of questions on the NBDHE. From a team of dental hygiene experts including lead editor Barbara Bennett, this Q&A resource is an excellent supplement to any NBDHE content review book! More than 1,680 multiple-choice questions provide comprehensive practice spanning the entire NBDHE, with 1,250+ items relating to Component A — more than six times the number of questions on the actual exam! — and 420 case-based questions related to Component B. Rationales accompany each question, fully explaining why each answer choice is either correct or incorrect and thus serving as secondary content review. Distribution of questions matches each category on the NBDHE test specifications, ensuring that you have adequate practice for each content area. An Evolve companion website includes all 1,250+ questions from the book plus additional case studies with color images and accompanying questions, available either in practice mode with instant feedback or in exam-simulation format with results and feedback provided at the end of the exam. A test creator and timer on Evolve generates NBDHE-style tests that mimic the number and distribution of questions on the NBDHE and also provides realistic practice with time management during the exam. 16 detailed case studies on Evolve, each of which includes a patient medical/dental history, completed periodontal chart, oral radiographs, clinical photographs, and 20-35 multiple-choice questions for patients in the five main categories covered on the NBDHE (adult periodontitis, pediatric, geriatric, special needs, and medically compromised). References to text sources make it easy to review or find more information on specific topics.

Are you constantly nagging your children to brush and floss their teeth? Where the Sugar Bugs Live is here to help! Most parents struggle when it comes to the morning and nighttime brushing routine, and it is a constant battle. Their children don't see the importance of proper dental care and would rather find something else to do. Where the Sugar Bugs Live is a book designed to give your children a visual of what happens when they don't take care of their teeth. The sugar bugs, all shapes and sizes, simply eat at their teeth. The goal is to help them realize the importance of removing these sugar bugs so they don't cause black holes (cavities). They will also learn where the sugar bugs live and how to brush and floss them away! This is just the book you need to create a happier brushing routine and a long-lasting visual that will stay with them forever. A portion of the proceeds will be given to families affected by childhood cancer.

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Making It Easy for Patients to Say "Yes" reveals how to make case acceptance of complex care dentistry predictably successful. Its easy-to-read style and common sense approach to case acceptance has helped thousands of dentists increase their profitability and lowered their stress. The benefits from reading Making It Easy for Patients to Say "Yes" are: Do more of the dentistry you love - Only after patients say "YES" can you use your clinical skills Boost practice profitability - Successful case acceptance is a big part of practice prosperity and personal wealth Create a successful case presentation process - Your team will OWN a case acceptance process that outlives any personnel changes Enjoy greater confidence - By knowing how to talk about finances without angering or embarrassing patients, you'll welcome the experience of offering complete care Never sound or feel like a salesman - You'll learn how to guide - not sell- dentistry, eliminating the fear of being diminished in the patient's eyes
