This is an annually updated presentation of Canada past and present. The contents in this volume are organized into sections dealing with Canada's culture; Geography; people; history (from New France to the constitutional debates in the late 20th century); political system (including the constitution, monarchy, parliament, legal and court system, federalism and the provinces, provincial governments, parties and elections); defense; economy; the future; and a comprehensive bibliography. The combination of factual accuracy and up-to-date detail along with its informed projections make this an outstanding resource for researchers, practitioners in international development, media professionals, government officials, potential investors and students. Now in its 33rd edition, the content is thorough yet perfect for a one-semester introductory course or general library reference. Available in both print and e-book formats and priced low to fit student and library budgets.

Wrapped up in a story of the British public's' rejection of the establishment is a much darker story about shady money, untoward digital campaign tactics, and a fraught battle exploding from the highest rungs of British politics and society. Brexit: The Establishment Civil War is a crucial examination of what is now driving British politics, the dark money and forces attempting to manipulate it, and the online warfare techniques that are being deployed in modern politics. Brexit is nothing more than an establishment civil war that erupted from the upper echelons of the Conservative party and engulfed the entire country. It unleashed the growing power of big data on a divided and austerity ravaged population by pouring petrol on hot button issues like immigration and sovereignty. The Leave campaigns reached into our social divides and pulled us apart all for their own gain. Josh Hamilton examines the underlying factors that led to the Brexit vote, how technology made us more vulnerable to manipulation, how both sides of the establishment went to war over their own self-interests, and how disaster capitalists will use Brexit to further enrich themselves at the expense of the entire country.

From an obscure, misty archipelago on the fringes of the Roman world to history's largest empire and originator of the world's mongrel, magpie language - this is Britain's past. But, today, Britain is experiencing an acute trauma of identity, pulled simultaneously towards its European, Atlantic and wider heritages. To understand the dislocation and collapse, we must look back! to Britain's evolution, achievements, complexities and tensions. In a ground-breaking new take on British identity, historian and barrister Dominic Selwood explores over 950,000 years of British history by examining 50 documents that tell the story of what makes Britain unique. Some of these documents are well-known. Most are not. Each reveal something important about Britain and its people. From Anglo-Saxon poetry, medieval folk music and the first Valentine's day letter to the origin of computer code, Hitler's kill list of prominent Britons, the Sex Pistols' graphic art and the Brexit referendum ballot paper, Anatomy of a Nation reveals a Britain we have never seen before. People are at the heart of the story: a female charioteer queen from Wetwang, a plague surviving graffiti artist, a drunken Bible translator, outlandish Restoration rakehells, canting criminals, the eccentric fathers of modern typography and the bankers who caused the finance crisis. Selwood vividly blends human stories with the selected 50 documents to bring out the startling variety and complexity of Britain's achievements and failures in a fresh and incisive insight into the British psyche. This is history the way it is supposed to be told: a captivating and entertaining account of the people that built Britain.

The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises.

The book examines the conceptual, economic, and fiscal impact(s) of the Social Protection Floor (SPF) initiative of the International Labor Organisation (ILO) and other policy influencers by first critically examining the methodologies used by the international agencies to estimate the fiscal costs of designated minimum package(s) of social protection programs. The book also briefly reviews the methodologies used and usefulness of the Social Protection Index (SPI) of the Asian Development Bank (ADB). Second, the book analyzes strategies and specific initiatives used by the selected East Asian countries (China, India, Indonesia, the Philippines, Thailand, and Vietnam), designed to progress towards the social protection goals underlying the Social Development Goals (SDGs) adopted by the United Nations in September 2015, and endorsed by the countries covered in this book. Finally, the book provides a framework for generating fiscal space to fund the social protection programs and initiatives. The country chapters utilize this framework in the context of each specific country to suggest generating fiscal space.

The first wave of the 78 million member baby boom generation is now reaching retirement age. The number of people age 62, the earliest age of eligibility for Social Security retired worker benefits, is expected to be 21 percent higher in 2009 than in 2008. In addition, by 2030, the number of workers supporting each retiree is projected to be 2.2, down from 3.3 in 2006. This demographic shift poses challenges to the economy, federal tax revenues, the nation's old-age programs, and individuals' financial security in retirement. For those who are able to work longer, later retirement can strengthen the economy and also retiree incomes by postponing the time at which people will start drawing retirement benefits rather than working. A wide range of factors including the features of employers' benefit plans, personal finances, social norms, health, and individual attitudes influence workers' decisions about when to retire. Federal policies may also play a role: these include Social Security, Medicare, and tax policies related to certain private retiree health and defined benefit (DB) and defined contribution (DC) pension plans.1 Identifying both the incentives posed by these policies and the extent to which workers respond to them can help to inform policy makers as they consider ways to address the demographic challenges facing the nation. To determine the extent to which federal policiesdirectly and indirectly-pose incentives and are influencing individuals decisions about the age at which they retire, the authors have pursued the following questions: (1) What incentives do federal policies provide about when to retire? (2) What are the recent retirement patterns, and is there evidence that recent changes in Social Security requirements have resulted in later retirements? (3) Is there evidence that tax-favored private retiree health insurance and pension benefits have influenced when people retire? This is a revised and excerpted version.

This book aims to explore various aspects of the use of moving images in fashion retail and fashion apparel companies in-store or online. The use of moving images is growing in numbers and in relevance for consumers. Films can be used in various forms by fashion businesses in traditional media like cinema or TV and in modern forms like in social media or moving images in high street stores. The book provides a data-oriented analysis of the state-of-the-art with certain future outlooks. Additional areas of covering fashion in moving images, such as 'fashion company identity films' or 'fashion and music videos' are covered in order to get a more complete analysis from a consumer influenced perspective.
