What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships-and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance.

And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, The Challenger Sale argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one-the Challenger- delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

Today, more and more candidates are competing for positions in the rewarding and lucrative field of pharmaceutical sales. In his down-to-earth and practical style, top headhunter Tom Ruff shares secrets he's gathered over sixteen years of grooming and placing top talent with more than one hundred of the country's top pharmaceutical companies.

As governments seek to mitigate the cost of state-subsidised healthcare, branding in the pharmaceutical industry has become a

critical issue. Drugs companies must change their methods of communication and distribution - focusing more on their direct relationship with the consumer. This requires fundamental changes in consumer behaviour, access to information, freedom of choice and value for money. Brands and brand values will play a leading role in this process, as has been seen with products such as Prozac and Viagra. This book by Interbrand Newell and Sorrell, the world's leading branding consultancy, provides cutting edge thinking on this area and lessons for anyone involved in brand development and management.
