evidence-based decision-making in practice\* Annals of Pharmacotherapy on the 4th Edition

Effectively learning pharmacology requires students to clearly see the connection between pharmacology, disease and patient care. Pharmacology for Nurses, 3e i (this is the standalone book) is structured to present pharmacology and pathology together, so students can more easily grasp the interrelationship between these subjects and provide a holistic perspective to patient care. A prototype approach, easy to follow presentation and extensive pedagogical aids enable students to understand key concepts and apply essential components of nursing care to drug therapy. tightly linking it to therapeutic goals and patient wellness. Organized by body systems and diseases, it places drugs in context with how they are used therapeutically. Students can then easily locate relevant anatomy, physiology, pathology, and pharmacology in the same chapter. Nursing Process Application features clearly relate pharmacology to key nursing processes. Features highlighting complementary therapies, community-oriented and evidence-based practices, and lifespan considerations help students make connections to nursing practice. To give readers a clear picture of the holistic nature of pharmacology, the Fifth Edition reflects current pharmacotherapeutics and advances in understanding disease. Also available with MyNursingLab® MyNursingLab is an online homework, tutorial, and assessment program designed to engage students in the Pharmacology course and improve results.

designed to teach you how to apply the principles of pharmacotherapy to real-world clinical practice. The case chapters in this book are organized into organ system sections that correspond to those of the DiPiro textbook. By reading the relevant chapters in Pharmacotherapy: A Pathophysiologic Approach you will be able to familiarize yourself with the pathophysiology and pharmacology of each disease state included in this casebook. Each case teaches you how to:

- Identify real or potential drug therapy problems
- Determine the desired therapeutic outcome
- Evaluate therapeutic alternatives
- Design an optimal individualized pharmacotherapeutic plan
- Develop methods to evaluate the therapeutic outcome
- Provide patient education
- Communicate and implement the pharmacotherapeutic plan
