' Post-theory ' : this compound ghost gives me a feeling of déj à vu.I want to emphasise that this is a feeling, in the same way as Jacques Derrida insists on the feeling he has about Marx and ghosts in Spectres of Marx: as he puts it, ' everyone reads, acts, writes with his or her ghosts ' .¹ I can attempt to rationalise this feeling of déj à vu.

"In all, New Directions in Post-Keynesian Economics proves that the intellectual vision for the realization of the Keynesian revolution is abundant. John Hillard, European Association for Evolutionary Political Economy Newsletter "The Pheby-edited essays should prove useful to anyone interested in post-Keynesian economics. The advent of the era of "e-Service," the provision of services over electronic networks like the internet, is one of the dominant business themes of the new millennium. It reflects the fundamental shift in the economy from goods to services and the explosive expansion of information technology. This book provides a collection of different perspectives on e-Service and a unified framework to understand it, even as the business community grapples with the concept. It features contributions from key researchers and practitioners from both the private and public sectors, as well leading scholars from the fields of marketing, information systems, and computer science. They focus on three key areas: the customer-technology interface; e-Service business opportunities and strategies; and public sector e-Service opportunities. The insights they offer will be equally useful to students, scholars, and practitioners.

This is a timely work which explores the validity of rational and subjective approaches to conflict resolution, considers the value of international law and organizations for addressing complex social phenomena, and outlines a structural approach to international conflicts. In addition it extends the analysis of conflict transformation to new issues on the international agenda, such as antagonism between urban and rural areas and threat to the environment.

Novels began to incorporate literary theory in unexpected ways in the late twentieth century. Through allusion, parody, or implicit critique, theory formed an additional strand in fiction that raised questions about the nature of authorship and the practice of writing. Studying this phenomenon provides fresh insight into the recent development of the novel and the persistence of modern theory beyond the period of its greatest success. In this book, Judith Ryan opens these questions to a range of readers, drawing them into debates over the value of theory. Ryan investigates what prompted fiction writers to incorporate and respond to theory nearly thirty years ago. Designed for readers unfamiliar with the complexities of theory, Ryan ' s book introduces the discipline ' s major trends and controversies and notes the salient ideas of a carefully selected set of individual thinkers. Ryan follows novelists ' adaptation to and engagement with arguments drawn from theory as they translate abstract ideas into language, structure, and fictional strategy. At the core of her book is a fascinating microstudy of French poststructuralism in its dialogue with narrative fiction. Investigating theories of textuality, psychology, and society in the work of Don DeLillo, Thomas Pynchon, J. M. Coetzee, Margaret Atwood, W. G. Sebald, and Umberto Eco, as well as Monika Maron, Alain Robbe-Grillet, Marguerite Duras, Marilynne Robinson, David Foster Wallace, and Christa Wolf, Ryan identifies subtle negotiations between author and theory and the richness this dynamic adds to texts. Resetting the way we think and learn about literature, her book reads current literary theory while uniquely tracing its shaping of a genre.

James Busumtwi-Sam and Laurent Dobuzinskis have assembled a leading team of experts in the field to examine how phenomena associated with globalization impact on political economy in theory and in practice. The volume employs a variety of theoretical and analytical approaches to examine the very changeable nature of the global political economy, in terms of academic analysis, policy and practice.

This major new book brings together leading researchers in the field in order to describe and analyse internationally significant theoretical and empirical work on offender supervision, and to address the policy and practice implications of this work within and across jurisdictions. Arising out of the work of the international Collaboration of Researchers for the Effective Development of Offender Supervision (CREDOS), this book examines questions and issues that have arisen both within effectiveness research, and from research on desistance from offending. The book draws out the lessons that can be learned not just about ' what works? ', but about how and why particular practices support desistance in specific jurisdictional, cultural and local contexts. Key themes addressed in this book include: New directions in theory and paradigms for practice Staff skills and effective offender supervision Different issues and challenges in improving offender supervision The role of families, ' significant others ' and social networks Understanding and supporting compliance within supervision Exploring the social, political, organisational and historical contexts of offender supervision Offender Supervision will be essential reading for academics, undergraduate and postgraduate students, policy makers, managers and practitioners interested in offender supervision.
