Promoting safe and effective nursing care, Nursing Outcomes Classification (NOC), 6th Edition standardizes the terminology and criteria needed to measure and evaluate outcomes that result from nursing interventions. Over 540 research-based nursing outcome labels — including 50 that are NEW to this edition — help to standardize expected patient outcomes. Specific indicators make it easier to evaluate and rate the patient in relation to outcome achievement. Written by an expert author team led by Sue Moorhead, this book is ideal for practicing nurses, students, educators, researchers, and administrators seeking to improve cost containment and patient outcomes. 540 research-based nursing outcome labels promote standardization of expected patient outcomes. Definitions, lists of indicators, publication facts lines, and references provide all of the information you need to understand outcomes. NEW! Approximately 50 new outcome labels allow you to better define patient outcomes that are responsive to nursing care.

customized recommendation, and then applying best practice in various point-of-care settings. Written by highly experienced implementation researchers working with practitioners, the book demonstrates how the synthesis and translation of evidence supports improvement of existing care and service delivery models, and produces increased benefit for both patients and health services. Examples drawn from the authors' first-hand experience—such as pressure injury prevention in acute care, transition of care for people with heart failure, and community leg ulcer care—illustrate the use of best practice in addressing care and quality issues. This important reference and guide: Outlines a planning framework that activates research and evidence in practice settings, moving knowledge into action and sustaining the use of best practice Introduces the framework that enables effective evidence-informed methodology and decision-making Features numerous illustrative field examples of both successful and unsuccessful implementations in a variety of practical situations Offers perspectives on best practice implementation from experienced practitioners and researchers Knowledge Translation in Nursing and Healthcare is a must-have for those wanting to implement, evaluate, and sustain best practice in the delivery of evidence-informed healthcare to patients, families, and communities.

Innovative, systematic, and user-friendly, Health Assessment in Nursing has been acclaimed through four previous editions for the way it successfully helps RN-level students develop the comprehensive knowledge base and expert nursing assessment skills necessary for accurate collection of client data. Maintaining the text's hallmarks—in-depth, accurate information, a compelling Continuing Case Study, and practical tools that help students develop the skills they need to collect both subjective and objective data—the Fifth Edition now features an exciting array of new chapters, a greater focus on diversity and health assessment through the lifespan, over 150 new illustrations, more than 300 new photos
