This dissertation
examines disaster
preparedness as
engaged at a large
university in southern
California using
inductive research
and grounded theory
data collection and

Bookmark File

PDF Southern

analysis methods.

The thesis consists of three parts, all addressing the

problem of disaster preparedness as

enacted in this at-risk context. I use in-depth interviews, archival analysis of disaster planning materials, and observation of preparedness

activities to answer

Bookmark File

PDF Southern

California
my research

questions. Part one of the dissertation asks what preparedness means for both staff and graduate students at the university. I observe how interpretations shape action or inaction in the face of a potential catastrophe and develop the notion of

Bookmark File

PDF Southern

California

preparedness as composed of two aspects; the collection and storage of material objects, resources, knowledge, and plans and imagined successful response to future scenarios.

The two aspects are highly moderated by major dimensions of

Bookmark File

PDF Southern

trust; faith in
infrastructure
catastrophic
Earthquake
continuity and trust in
reproducible realities.
Response Plan
These notions of trust
impede people's
preparedness
practices on both
organizational and
individual levels. The
second part
distinguishes 'situated
preparedness' from
traditional

Bookmark File

PDF Southern

preparedness and examines how it is enacted in the study context through two sets of action categories. Explicit practices are the traditional planning actions people engaged in accordance with official recommendations. In contrast, implicit

Bookmark File

practices are the
taken for granted
activities and
resources people use
in everyday life with
the potential to help
people in response to
disaster. I categorize
these practices and
develop a new
conceptualization of
preparedness as
carried out through an
interaction and action

Bookmark File

PDF Southern

blending between the sets of practices, modified through dynamic aspects of context. The final part of the dissertation presents official and unofficial narratives of preparedness. I identify important sources of disconnection between students and staff rooted in the

Bookmark File

PDF Southern

expectation of
personal responsibility
and compliance in
disaster preparedness
when response is
largely a situational
and collective effort. I
outline a situated
approach to help
facilitate preparedness-
engaged processes
for both sets of actors,
acknowledging both
groups as experts of

their own context, and bridging gaps identified in this section of research.

The dissertation as a whole constructs preparedness as a situated, collaborative effort, designed to build on the inherent resilience of both sets of actors in bridging identified disconnections.
