Testosterone therapy can improve the overall health and feeling of well-being of aging men, improving sex drive, mental functions, and energy levels and reducing the risk of cardiovascular disease.--Library Journal

Do You Have Low T? As a man ages, a slow decline takes root that, day to day, is imperceptible. Sometime around age 30, levels of the male hormone testosterone begin to drop each year. One morning he looks in the mirror and sees someone who he doesn't recognize. He's tired-looking, lacks motivation, his belly is sagging over his belt, his mind is foggy, and maybe his sex drive has evaporated. What happened? Oh, you're just getting older, people tell him-even his doctor! Endocrinologist Florence Comite, MD, doesn't believe we should accept aging as is. In fact, she has helped many men to turn around their health for the better. She believes any man can restore his body, mind, and energy; prevent disease; and feel strong, confident, and in control once again. How? By using her Precision Medicine analysis, a highly personalized plan of action designed to combat the decline triggered by the age-related fall in testosterone. This book will show you how to quantify your own health and then make lifestyle changes that will reduce your belly fat and risk of diabetes, revitalize your sex drive and strengthen your erections, and give you more muscle and greater mental agility. Because testosterone affects all of the above aspects of a man's vitality, Dr. Comite shows readers how the cutting-edge science of hormone optimization for men with low testosterone is an effective way to prevent the disorders of aging.
