Narcissists are everywhere. There are millions of them in the United States alone; politicians, entertainers, businesspeople, your neighbors. Recognizing and understanding them is crucial to your not being overtaken by them, says Jeffrey Kluger in his provocative book about this insidious disorder. The odds are good that you know a narcissist; probably a lot of them. You see them in your office, on TV, maybe even in the mirror. The odds are also good that they are intelligent, confident, and articulate/the center of attention. With intelligence, sight and wit, Kluger explains the startling new research into narcissism and the insights that research is yielding. He explains how narcissism and narcissists affect our lives at work and at home, on the road, and in the halls of government; what to do when we encounter narcissists; and how to neutralize narcissism's effects before it's too late. As a writer and editor at Time, Kluger knows how to take science's cutting-edge research and transform it into perceptive, accessible writing/which he does brilliantly in The Narcissist Next Door. Highly readable and deeply engaging, this book helps us understand narcissism and narcissists more fully.
