Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

This repair manual covers Suzuki SV650 and SV650S 1999 to 2005.
