on Progress in Automotive Technologies (ICPAT) 2019. The contents focus on several aspects of the automobile industry from design to manufacture, and the challenges involved therein. The book covers latest research trends in the automotive domain including topics such as aerodynamic design, vehicle sensors and electronics, engine combustion modeling, noise and vibration in vehicles, electric and hybrid vehicles, automotive tribology, and battery and fuel cell technologies. The book highlights the use of emerging technologies to tackle the growing environmental challenges. This book will be of interest to students, researchers as well as professionals working in automotive engineering and allied fields.

What Globalization Now Means for Your Business Executives can no longer base their strategies on the assumption that globalization will continue to advance steadily. But how should they respond to the growing pressures against globalization? And what can businesses do to control their destinies in these times of uncertainty? In *The New Global Road Map*, Pankaj Ghemawat separates fact from fiction by giving readers a better understanding of the key trends affecting global business. He also explains how globalization levels around the world are changing, and where they are likely to go in the future. Using the most up-to-date data and analysis, Ghemawat dispels today's most dangerous myths and provides a clear view of the most critical issues facing policy makers in the years ahead. Building on this analysis, with examples from a diverse set of companies across industries and geographies, Ghemawat provides actionable frameworks and tools to help executives revise their strategies, restructure their global footprints, realign their organizations, and rethink how they work with local governments and institutions. In our era of rising nationalism and increased skepticism about globalization's benefits, *The New Global Road Map* delivers the definitive guide on how to compete profitably across borders.

This report presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases. It provides an overview of industrial policy models for countries at different development levels and the role of investment policies within each model. It analyses the investment policy implications of the new industrial revolution for high-, middle- and low-income countries and offers a toolkit for investment policymakers on how to use investment policies for new industrial development strategies.

The digital revolution is changing virtually every aspect of the business world. However, most attempts at the digital transformation of enterprises fail – largely because of a lack of comprehensive and coherent strategy. This book takes lessons learned from the rise of the digital platform giants and explores how they can be adapted and effectively applied to established businesses, allowing them to compete within the new digital business paradigm. Offering a holistic perspective on the business and technology landscape, the book describes the megatrends, evolution and impact of digital technologies and business models. It brings together what for many is a disjointed set of business transformation imperatives, to provide a practical guide to digital success. Drawing on the authors' decades of experience in supporting transformation and innovation, the book lays out a path to
