The 50 most significant principles and styles in architecture, each explained in half a minute. The bestselling 30-Second series offers a new approach to learning about those subjects you feel you should really understand. Every title takes a popular topic and dissects it into the 50 most significant ideas at its heart. Each idea, no matter how complex, is explained using a mere two pages, 300 words, and one picture: all easily digested in only half a minute. 30-Second Architecture presents you with the foundations of architectural knowledge. Expert authors are challenged to define and describe both the principles upon which architects depend, and the styles with which they put those principles into practice. So, if you want to know your arch from your elevation, and your Baroque from your Brutalism, or you wish to top off your next dinner party with a stirring speech on how form follows function, this is the quickest way to build your argument.

New York never sleeps, they say, and 30-Second New York offers up an energetic tour of the city, looking at its founding fathers (and mothers), at key events in its history, and at the buildings and people that make up its unique character, taking in all of the Five Boroughs, not just Manhattan. Find out who gave the city Central Park and the Empire State Building, learn what it was like to arrive off the boat at Ellis Island, relive the glory days of Coney Island, and admire the way New York has presented itself to the world culturally, in the art, literature, and music of those who love it. It's an absorbing virtual visit to the liveliest city on Earth.

If you are tired of London, are you really tired of life? 30-Second London agrees with Dr. Johnson's famous statement, taking the history of one of the most diverse cities on Earth and looking at the forces that shaped it, from the first traces of a Neanderthal settlement on the banks of the River Thames to today's vast and varied metropolis. Along the way, readers will discover underground London, secret London, suburban London, and much more, on a revealing whistlestop city tour.

Who invented photography first, Fox Talbot or Louis Daguerre? Who got the patent? Who made the most money? Who are the greatest photographers and what have their contributions been? This book takes the 50 most important aspects of photography – both the major styles and the key technical aspects that make them possible – and explains each in two pages, 300 words and one picture. The book also includes six profiles of the greatest names in the history of photography and shares their contributions. Whether you pick it up for 30-seconds at a time or read it from cover-to-cover, this book is guaranteed to have you thinking about your own and other people's photography in a whole new way.

The 50 most important structures and systems in the human body, each explained in half a minute. The bestselling 30-Second series offers a new approach to learning about those subjects you feel you should really understand. Every title takes a popular topic and dissects it into the 50 most significant ideas at its heart. Each idea, no matter how complex, is explained using a mere two pages, 300 words, and one picture: all easily digested in only half a minute. 30-Second Anatomy offers you an instant diagnosis of how your body works. Whether you're a medical student, an artist, a body worker, or simply want to know what your doctor is talking about when he mentions your humerus, this is the quickest way to get under your own skin. Dissecting the workings of everything from your heart to your brain into 30-second summaries, this is the quickest way to understand the structures and systems that are you. Supported by biographies of the pioneers in anatomy studies, it's the book that would have kept Burke and Hare home at night.

The 50 most important achievements of a timeless civilization, each explained in half a minute. Ancient Greek civilization laid the foundations for so many aspects of modern western life, from architecture to philosophy. But can you recite the Classical orders with confidence (are you sure what an order actually is?), and would you be able to define the key contributions of Socrates, Plato, and Aristotle? 30-Second Ancient Greece offers an engrossing tour of the Hellenic world, appealingly served up in easily absorbed nuggets. An internationally bestselling series presents essential concepts in a mere 30 seconds, 300 words, and one picture. Presents a unique insight into one of the most creative and influential civilizations, where military might and architectural brilliance flourished. From temples and oracles to soldiers and slavery, from beautiful pottery to tragic drama, this is the key to understanding the 50 crucial ideas and innovations that developed and defined one of the world's greatest civilizations.

Are you an art-movie buff or a blockbuster enthusiast? Can you reel off a list of New Wave masterpieces, or are you more interested in classic Westerns? Most of us love the movies in one form or another, but very few of us have the all-round knowledge we'd like. 30-Second Cinema offers an immersion course, served up in neat, entertaining shorts. These 50 topics deal with cinema's beginnings, with its growth as an industry, with key stars and producers, with global movements—from German Expressionism to New Hollywood—and with the movies as a business. By the time you've worked your way through, you'll be able to identify the work of George Melies, define auteur theory or mumblecore in a couple of pithy phrases, and you'll have broadened your knowledge of global cinema to embrace not only Bollywood but Nollywood, too. All in the time it takes to watch a couple of trailers.

The 50 most thought-provoking theories of life, each explained in half a minute. 30-Second Biology tackles the vital science of life, dissecting the 50 most thought-provoking theories of our ecosystem and ourselves. At a time when discoveries in DNA allow us to feel more connected than ever to the natural world, this is the fastest route to an understanding of the tree of life. Whether you're dipping into the gene pool, unlocking cells, or conversing on biodiversity, this is all the knowledge you need to bring life to the dinner-party debate. An internationally bestselling series presents essential concepts in a mere 30 seconds, 300 words, and one image. The 50 most important ideas and innovations in biology dissected and explained clearly without the clutter. The fastest way to learn about cells, reproduction, animals, plants, evolution and ecosystems.

The 50 key modes, garments, and designers, each explained in half a minute! Even if you're not a regular follower of Suzy Bubble, Le Happy, or The Sartorialist, you probably have some feeling for fashion. Most people have a vague idea of what's in, what's out, and what they might consider putting on their own backs. Less familiar to most, however, is the way fashion works as a global business - a multi-billion-pound industry, employing over 27 million people - just who decides what's cutting edge and what's long past its sell-by date. 30-Second Fashion offers an engrossing crash course to how the style world works today, alongside an engaging look at the founding fathers (and mothers) of fashion who set it up that way.
