Want more fascinating facts about poop? We've got a new book! Check out *Everybody Poops 10 Million Pounds: Astounding Fecal Facts from a Day in the City* from author Deuce Flanagan on Amazon today. **ONCE UPON A TIME** when you were little, you learned that everyone poops. But did you ever discover how much? Well, sit down on that cold porcelain throne and get ready to laugh your butt off at the most amazing, hilarious, need-to-go facts on the one thing everyone does--but nobody talks about. Filled to the rim with piles of fascinating dirty fun, this illustrated kids' book for grown-ups answers all the questions you never thought to ask: • How do astronauts poop in space? • Where does poop go after you flush? • Why can I see the corn but not the chicken? • Can I light my poop on fire? • Who invented the first flushing toilet? • What's the poop on Michael Jackson, Elvis and John Wayne?

'Malala is an inspiration to girls and women all over the world.' - J.K. Rowling
Written by Malala in collaboration with critically acclaimed author, Patricia McCormick, this children's edition tells the remarkable story of a girl who knew from a young age that she wanted to change the world - and did. Her journey will open your eyes to another world and will make you believe in hope, truth, miracles, and the determination of one person to inspire change. Raised in a once-peaceful area of Pakistan transformed by terrorism, Malala was taught to stand up for what she believes. So she fought for her right to be educated. And on 9 October, 2012, she nearly lost her life for the cause. She was shot point-blank on her way home from school. No one expected her to survive. Now, she is an international symbol of peaceful protest and the youngest-ever Nobel Peace Prize winner. This book is a must-read for anyone who believes in the power of change.

Tells how research aimed at a cure for pneumonia, based on the determination of how an inactive bacterium became active, led to an understanding of the role of DNA

MEMs Materials and Processes Handbook" is a comprehensive reference for researchers searching for new materials, properties of known materials, or specific processes available for MEMS fabrication. The content is separated into distinct sections on "Materials" and "Processes". The extensive Material Selection Guide" and a "Material Database" guides the reader through the selection of appropriate materials for the required task at hand. The "Processes" section of the book is organized as a catalog of various microfabrication processes, each with a brief introduction to the technology, as well as examples of common uses in MEMs.

Increased agricultural productivity is a major stepping stone on the path out of poverty in sub-Saharan Africa and South Asia, but farmers there face tremendous challenges improving production. Poor soil, inefficient water use, and a lack of access to plant breeding resources, nutritious animal feed, high quality seed, and fuel and electricity-combined with some of the most extreme environmental conditions on Earth-have made yields in crop and animal production far lower in these regions than world averages. Emerging Technologies to Benefit Farmers in Sub-Saharan Africa and South Asia identifies sixty emerging technologies with the potential to significantly improve agricultural productivity in sub-Saharan Africa and South Asia. Eighteen technologies are recommended for immediate development or further exploration. Scientists from all backgrounds have an opportunity to become involved in bringing these and other technologies to fruition. The opportunities suggested in this book offer new approaches that can synergize with each other and with many other activities to transform agriculture in sub-Saharan Africa and South Asia.
