Written by two leading scholars with 60 years of collective experience in the area, this insightful updated second edition provides a clear and concise introduction to the fundamental components of international trade law, presenting the basic structure and principles of this complex area of law, alongside elucidation of specific GATT and WTO legal rules and institutions. Key updates include references to the most recent cases, decisions and treaty negotiation developments, analysis of populist critiques of international trade law and analysis of new areas including digital trade and security exceptions.

A technical analysis classic, newly updated to help traders develop and forward-test a high-performance trading system for today's markets In trading, a winning system is everything. While it is theoretically possible to buy a "canned" trading system, most experts agree that the best system is proprietary to each trader--developed, implemented, and tested by the individual to suit his or her exact requirements. A stimulating mix of cutting-edge techniques, timeless principles, and practical guidelines, this updated

reader contains new articles exclusive to this reader by leading academics from around the world dealing with quantitative and qualitative analyses of this increasingly popular and important area of finance. Articles address new methods of IPO performance, international IPOs, IPO evaluation, IPO underwriting, evaluation and bookbuilding. Although numerous articles are technical in nature, with econometric and statistical models, particular attention has been directed towards the understanding and the applicability of the results as well as theoretical development in this area. This reader will assist researchers, academics, and graduate students to further understand the latest research on IPOs. *Interest in IPOs is increasing again after the Google IPO, and IPOs are up significantly from last year *Chapters by well known academics provide an international perspective, describing research results from IPO data in countries spanning the globe *Research is based on real results from IPO data collected over the past 5-7 years

With about \$450 billion in assets, funds of hedge funds are the most recent darling of investors. While hedge funds carry high risk for the promise of high returns they are designed for the very rich and for large institutional investors such as pension funds. A Fund of Hedge Funds (FOF) spreads investments among a number of hedge funds to reduce risk and provide diversification, while maintaining the potential for higher than average returns. Odds are that some pension fund of yours is invested heavily in these products, and more recently these FOFs have been opened to more and more individual investors in offshore jurisdictions with lower minimum entry levels. Since this is a new and extremely fast-moving financial phenomenon, academic research has just begun in earnest, and this is the first book to present rigorous academic research by some of the leading lights in academic finance, carefully analyzing the broad array of issues involved in FOFs. * With over \$450 billion in assets, hedge funds of
