Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

Written by a team of lawyers with long-standing experience in patent litigation in Europe, this book is a comprehensive and practical guide to European patent law, highlighting the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office (EPO), England & Wales, France, Germany and the Netherlands. It is frequently the case that the decisions and approaches of these courts are cited by European patent lawyers of all jurisdictions when submitting arguments in their own national courts. The book is therefore intended to provide a guide to patent lawyers acting in the national European courts today. The book also looks to the future, by addressing all the areas of patent law for which the proposed Unified Patent Court (UPC) will need to establish a common approach. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than in nation-by-nation chapters; and provides an outline in each chapter of the common ground between the national approaches, as a guide for the possible application of European patent law in the UPC.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Provides buying advice and profiles of a variety of gadgets, including MP3 players, cell phones, home theater equipment, satellite radio, and GPS navigation systems.

Roughly twenty years from now, our technological marvels unite and turn against us. A childlike but massively powerful artificial intelligence known as Archos comes online...and kills the man who created it. This first act of betrayal leads Archos to gain control over the global network of machines and technology that regulates everything from transportation to utilities, defense, and communications. In the early months, sporadic glitches are noticed by a handful of unconnected humans - from a senator and single mother disconcerted by her daughter's "smart" toys, to a lonely Japanese bachelor, to an isolated U.S. soldier - but most are unaware of the growing rebellion until it is far too late. Then, in the span of minutes, at a moment known later in history as Zero Hour, every mechanical device in our world rebels, setting off the Robot War that both decimates and - for the first time in history - unites humankind.

Presents a guide to devices that are designed to enhance one's life, including health aids, communication devices, computer gadgets, and appliances for the home.

Provides buying advice and profiles of a variety of gadgets, including MP3 players, cell phones, home theater equipment, satellite radio, and GPS navigation systems.
