These concise revision notes are aimed at candidates preparing for UK and international FRCS (Trauma & Orthopaedics) exit examination as well as the European Board (EBOT) and SICOT diplomas. The book has been written in an easy to read style, with a focus on being an exam candidate's companion for quick revision on the go. Candidates are usually caught between a busy job and the demands of these challenging exams. This book covers the depth and breadth of Trauma & Orthopaedics knowledge to help candidates sail through the Fellowship exit examinations. We have aimed to provide a high quality one stop concise knowledge bank to cover the whole syllabus of Trauma & Orthopaedics in a well organised bullet point style. This will provide a useful resource for both part 1 (MCQs, EMQs) as well as part 2 (Viva and Clinical) components of the exit examinations. It is an ideal companion to complement your preparation for the examination with the most useful information presented in the most succinct manner. The authors are senior members of the FRCS Mentor Group who have between them ample up to date experience and knowledge with the Fellowship examination. They have attended most postgraduate orthopaedic courses in the UK and internationally, and have reviewed all relevant exam book. They have excellent track records of helping many candidates to pass their exams. This book is complemented by hundreds of diagrams, illustrations, radiographs and clinical images. There are QR codes interspersed within the chapters which when scanned using your smartphone camera, link up to either the corresponding open-access seminal paper or to a YouTube video pertaining to the topic discussed. We look forward to the readers' feedback that will help us immensely to improve the contents in the next edition for the benefit of future orthopaedic aspirants. Head over to Amazon, Google Books and to BookAuthority.org to leave a review, or write to the email below. We also invite anyone who is interested to become an author of the next edition, or to discuss future collaboration or sponsorship opportunities to contact the editor on: thefrcsmentor@gmail.com

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-s

Ten papers of thirty questions each cover the entire syllabus, with questions pitched at the right level for the exam.

Complete guide to explore 3d printing, scanning, sculpting, and milling Key features Step-by-step guide to learn the techniques, methodologies, and finished products Learn to employ 3D technology in new and inventive ways Know to enlarge, reduce, and repurpose existing artwork. Book is a practical tutorial, packed with real-world case studies to help you to design models that print right the first time. Learn to design models, choose materials, work with different printers, and integrate 3D printing with traditional prototyping to make techniques more efficient. DescriptionThis book 3D Printing Made Simple takes you through this exciting innovation, a technology called 3D Printing. It is revolutionising the way we do a lot of things and not just the creation of physical objects. The huge growth rates are a direct result of its applications for prototyping and mass production in a number of industries, thanks to an ever-increasing list of 3D printable materials. The World Economic Forum describes it as one of the four pillars of the 4th Industrial Revolution alongside AR, VR & AI, big data, blockchains etc. Many developing countries like India, completely missed the 1st two industrial revolutions (steam & petrol engines) and partially benefitted in the 3rd (electronics/computers). Now can we afford to not, or just partially participate in the 4th Industrial Revolution?Book adopts a practical approach, with step-by-step instructions to help guide readers. Lots of screenshots are given for each and every step where needed to design a high-quality model in Blender for 3D printing.What will you learn 3D Printing/3D Prototyping, its history, process, applications, SDG Goals. 3D Printing technologies, SWOT AnalysisWho this book is forIf you are a Blender user or someone who wants to make 3D objects suitable for 3D printing and if you are familiar with SketchUp and want to print the models which you have designed, then this book is ideal for you.Table of contents1. Part 11.1 What is the future going to be? An overview1.2 4th Industrial Revolution 1.3 History of 3D Printing and what humans want1.4 What is 3D Printing or 3D Prototyping and how it differs from the traditional prototyping? 1.5 The process of 3D Printing 1.6 Example & Applications of 3D Printing1.7 Utility of 3D Printing1.8 Comparing 3D Printing to Mass Production1.9 UN - SDG Goals & 3D PrintingSumming up Part 1 2. Part 22.1 Advantages of 3D Printing & where it's ideal2.2 Kinds of 3D Printing technologies2.3 SWOT Analysis of 3D Printing & survey results2.4 3D Printing in Schools & Universities2.5 3D Printing & how to empower ourselves2.6 Introduction to Design2.7 Live Use cases2.8 What we do2.9 Wrapping Up Part 2 GlossaryReferencesMust-see videos About the authorAvikshit Saras went to Modern School - New Delhi, thereafter did his BSc. from University of Bradford and his MSc. from the University of Manchester. He has been involved in numerous businesses such as financing of vehicles, dairying, pharmaceuticals, investment advisory and 3D printing. In 3D printing they engage with organisations for 3D printing training, consulting, prototyping services & installations. He has trained students & teachers at Indian School Muscat, DPS Faridabad, Pathways Gurgaon, Shalom, Scottish High, numerous other individuals, delivered 3DP talks in about 100 institutions and consulted for organisations. His Blog: avikshitsaras.wordpress.com/ His website: dca-vet.nl (Company Website)His LinkedIn Profile: linkedin.com/in/avikshit-saras-msc-coo-748721a

Climatology, the study of climate, is no longer regarded as a single discipline that treats climate as something that fluctuates only within the unchanging boundaries described by historical statistics. The field has recognized that climate is something that changes continually under the influence of physical and biological forces and so, cannot be understood in isolation but rather, is one that includes diverse scientific disciplines that play their role in understanding a highly complex coupled "whole system" that is the earth's climate. The modern era of climatology is echoed in this book. On the one hand it offers a broad synoptic perspective but also considers the regional standpoint, as it is this that affects what people need from climatology. Aspects on the topic of climate change - what is often considered a contradiction in terms - is also addressed. It is all too evident these days that what recent work in climatology has revealed carries profound implications for economic and social policy; it is with these in mind that the final chapters consider acumens as to the application of what has been learned to date.

This is the first book exploring the unique dynamics created by a multidisciplinary trauma team and how crisis management strategies can improve teamwork and communication and, potentially, improve patient resuscitation outcomes. Crisis resource management (CRM) is integral to the way that we manage ourselves, team members, and patients during emergency situations. It is essentially the ability to translate knowledge of what needs to be done into effective actions during a crisis situation. Building on the revolutionary American College of Surgeons Advanced Trauma Life Support (ATLS®) course, Trauma Team Dynamics illustrates the integration of the principles of CRM to team dynamics throughout the resuscitation -from the scene, through pre-hospital care and transport, to the trauma bay, and finally to definitive care and beyond. The editors and contributors are international experts in trauma, critical care, emergency medicine, nursing, respiratory therapy, and pre-hospital care and include NASA- and United States military-affiliated experts. Trauma Team Dynamics is intended for use as both a day-to-day clinical resource and a reference text, and includes self-assessment questions as well as guidance on CRM curriculum design and implementation.

This book is the unique book with combination of colour atlas of Paediatric surgery and MCQs in Paediatric surgery. In Colour Atlas patient's photos, X-rays, CT scan and MRI can be seen. Among patient's photos there are pre-operative and per-operative photos, as well as photos of complications. My other book "MCQs in Paediatric surgery" also has been merged in this book. This MCQs book is unique in sense, that it provides lot of specific paediatric surgical knowledge directly in MCQs with short and to the point explanations. Atlas gives classical features of disease in images that helps in spot diagnosis of disease. Little explanation about the image is given at side. Nearly all the paediatric surgical cases are gathered at one place. In most of the clinical examination discussion starts from apparent finding, in this regards, this atlas greatly helps in spot diagnosis of the cases. MCQs help in passing theoretical examination. This book is beneficial for all paediatric Surgery examination, general surgical examination to cover portion of pediatric surgery and pediatric medicine examination to cover differential diagnosis of surgical conditions. This Atlas also gives an idea to general practitioner about clinical spot diagnosis of paediatric surgical cases and medical students about awareness of paediatric surgical conditions

Simulation in Surgical Training and Practice is reviewed extensively in this important Surgical Clinics of North America issue. Articles include: Applying Educational Theory to Simulation Based Training and Assessment in Surgery; Figuring out Team Simulation Training; Faculty Development for Simulation Training; The Evolving Role of Simulation in Teaching Surgery in Undergraduate Medical Education; Using Simulation in Inter-Professional Education; Current Status of Simulation Based Training in Graduate Medical Education; National Simulation-based Training of Fellows: The Vascular Surgery Examp[] Paying For it: Funding Models for Simulation Centers; Surgical Simulation Centers as Educational Homes for Practicing Surgeons; Better Assessment: Advanced Engineering Technology for Measuring Performance In and Out of the Simulation Lab; Moving the Needle - Simulation's Impact on Patient Outcomes; Human Factors Engineering and Effective Simulation - Partners for Improved Patient Safety; Simulation for the Assessment and Improvement of Teamwork and Communication in the Operating Room; Using Simulation to Improve Systems; Simulation for Maintenance of Certification; and more!
