Barbados - Wikipedia

Barbados is a small Caribbean island better known as a tourist destination rather than for its culture. The island was first claimed in 1627 for the English King and remained a British colony until independence was gained in 1966. This firmly entrenched British culture in the Barbadian way of life, although most of the population are descended from enslaved Africans taken to Barbados to work on the sugar plantations. After independence, an official desire to promulgate the country's African heritage led to the revival and recontextualisation of cultural traditions. Barbadian tuk music, a type of life and drum music, has been transformed in the post-independence period from a working class music associated with plantations and rum shops to a signifier of national culture, played at official functions and showcased to tourists. Based on ethnographic and archival research, Sharon Meredith considers the social, political and cultural developments in Barbados that led to the evolution, development and revival of tuk as well as cultural traditions associated with it. She places tuk in the context of other music in the country, and examines similar musics elsewhere that, whilst sharing some elements with tuk, have their own individual identities.

Looks at the staus of such traditional Caribbean music styles as gospel and calypso, explores the arrival of new musical styles in the Eastern Caribbean, and discusses electronic music and Caribbean music videos.

Barbados - Wikipedia

In Plenty and in Time of Need demonstrates how the unique history of Barbados has contributed to complex relations of national, gendered, and sexual identities, and how these identities are represented and interpreted on a global stage. As the most widespread manifestation of social commentary, the book uses music and performance to analyze the competing ideals and realities of the national culture. It details the histories of prominent musical artists, including the prolific Pan-Africanist calypsonian the Mighty Gabby, the world-renowned Merrymen, Soca Queen Alison Hinds, artist/activist Rupee, and international superstar Rihanna. Using these artists, the project analyzes how femininity, masculinity, and sexuality are put in service of Barbadian nationalism. By examining websites, blogs, and digital products of these artists in conversation with Barbadian tourism, the book re-examines the ways in which commodity, sexuality, gender performance, and diasporic consciousness undergird individual careers and national representations.

Rihanna is arguably the most commercially successful Caribbean artist in history. She is Barbadian and has been unwavering in publicly articulating her national and regional belongings. Still, there have been varied responses to Rihanna's ascendancy, both in the Barbadian public and Caribbean community at large – responses that reveal as much about our own national/regional anxieties as they do about the artist herself. The cutting edge, boundary-transgressing, cultural icon Rihanna is certainly subject to moralistic scrutiny from her global audiences as well; however, the essays in this collection purposely seek to de-centre the dominance of the Euro-American gaze, focusing instead on considerations of the Caribbean artist and her oeuvre from a Caribbean postcolonial corpus of academic inquiry. To this end, Rihanna: Barbados World Gurl in Global Popular Culture brings together U.S. and Caribbean based scholars to discuss issues of class, gender, sexuality, race, culture, and economy. Using the concept of diasporic citizenship as a central theoretical frame, this book intervenes in current questions of national and transnational circuits of exchange as they pertain to the commoditization and movement of culture, knowledge, values, and identity. The contributors- drawing from literature, history, musicology, sociology, cultural studies, feminist, gender, and queer studies, the creative/cultural industries and political science - approach the subjects of Rihanna, globalization, gender and sexuality, commerce, transnationalism, Caribbean regionalism, and Barbadian national identity and development, from different disciplinary and at times radically divergent perspectives. At the same time, the essays collectively work through the limitations, possibilities and promise of our best Caribbean imaginings.

Presents a history of the interdependence of sugar, slavery, and colonial settlement in the New World through the story of the author's ancestors, exploring the myriad connections between sugar cultivation and her family's identity, genealogy, and financial stability.
