Being and Becoming is a wide-ranging analysis of the nature of being and selfhood. The book presents an original, integrated paradigm with the aim of creating a comprehensive overview of the human condition—and finding ways to alleviate suffering. In essence, the book explores the question, “What does it mean to be?” Being and Becoming begins with fresh interpretations of the work of Martin Heidegger and Buddhist, Taoist, and Christian writings as they relate to this question. Most of Being and Becoming, however, is about the nature of self and selfhood as a process of “I-am-this,” “my becoming” rather than “my being.” Author Franklyn Sills

interweaves concepts from object relations theories, psychodynamics, pre- and perinatal psychology, and Buddhist self-psychology, along with his own rich experience as a Buddhist monk, somatic therapist, and psychotherapist, into his inquiry. The works of Fairbairn and Winnicott are discussed in depth, as are Winnicott and Stern ' s insights into the nature of the early holding environment, the infant-mother relational field, and early perceptual dynamics. A thoughtful guide for psychologists, therapists, counselors, and other health professionals, the book is also ideal for Buddhists and anyone looking for alternative therapy models.

While existentialism has long been associated with Parisian Left Bank philosophers sipping cocktails in smoke-filled cafés, or with a brooding, angst-filled outlook on life, Gosetti-Ferencei shows how vital and heterogeneous the movement really was. In this concise, accessible book, Gosetti-Ferencei offers a new vision of existentialism. As she lucidly demonstrates, existentialism is a rich and diverse philosophy that encourages meaningful engagement with the world around us, offering a host of fascinating concepts that pertain to life as we experience it. The movement was as heterogeneous as it is now misunderstood, influenced by jazz music, involving diverse thinkers from around the world, challenging

received ideas about the meaning of human existence. Part of the difficulty in defining existentialism is that it was never a unified philosophy, but came to identify a set of shared concerns about the meaning and possibility of human freedom, as it may be expressed in authentic choices, actions, and projects. Existentialists all explored how, in the absence of traditional reassurances about the meaning of life, we may transcend our present circumstances, and give our situation new meaning. With existentialism, concrete, lived experience of the single individual emerged from the shadow of abstract systems and long-defended traditions, and became subject-matter in its own right for philosophical inquiry. Far from

solipsistic, Gosetti-Ferencei shows that existentialist attention to the human self can be intertwined with ways of conceiving the world, our being with others, the earth, and the encompassing concept of being. Fully appreciating what existentialism has to offer requires recognizing the rich diversity of its prospects, which involve not only anxiety, absurdity, awareness of death and the loss of religious meaning, but also hope, the striving for happiness, and a sense of the transcendent. *On Being and Becoming* unpacks this philosophical movement's insights, and reveals how its core ideas promote creative responses to the question of life's meaning.

Heidegger's death, many of his early writings--notes and talks, essays and reviews--have made it into print, but in such scattershot fashion and erratic translation as to mitigate their usefulness for understanding the development, direction, and ultimate shape of his work. This timely collection, edited by two preeminent Heidegger scholars, brings together in English translation the most philosophical of Heidegger's earliest occasional writings from 1910 to the end of 1927. These important philosophical documents fill out the context in which the early Heidegger wrote his major works and provide the background against which they appeared. Accompanied by incisive commentary, these pieces from

Heidegger's student days, his early Freiburg period, and the time of his Marburg lecture courses will contribute substantially to rethinking the making and meaning of Being and Time. The contents are of a depth and quality that make this volume the collection for those interested in Heidegger's work prior to his masterwork. The book will also serve those concerned with Heidegger's relation to such figures as Aristotle, Dilthey, Husserl, Jaspers, and Löwith, as well as scholars whose interests are more topically centered on questions of history, logic, religion, and truth. Important in their own right, these pieces will also prove particularly useful to students of Heidegger's thought and of twentieth-century

Many people spend considerable time seeking a sense of purpose in life and, concomitant with that, a sense of personal identity. This book demystifies this search, revealing why this search is a fallacy. The purpose is to inform readers about results in neuroscience and biophysics that may guide us to some liberation needed in the current age of great complexity in life with a diverse burden of chores; a deliverance from some afflictions that prevent individuals from achieving the true purpose of our lives. Among these afflictions we find two primordial concerns: the belief and subsequent attachment to a self, and the conviction that life must

have a deep purpose in which we are major players. While this is a scientific text, it can easily be read by a lay audience, written with minimal technical jargon and with references to scientific papers enough to satisfy the curious. We have tried to extract the essence of scientific observations such that we can glimpse at those aforementioned concerns about the self and life, observations which help us comprehend what we are and what we become, the being and becoming of our own selves and natural phenomena around us. Through a series of exquisite encounters with children, and through a lucid opening up of new aspects of poststructuralist theorizing, Bronwyn Davies opens up new ways of thinking about, and intra-acting with, children. This book carefully guides the reader through a wave of thought that turns the known into the unknown, and then slowly, carefully, makes new forms of thought comprehensible, opening, through all the senses, a deep understanding of our embeddedness in encounters with

each other and with the material world. This book takes us into Reggio-Emilia-inspired Swedish preschools in Sweden, into the author ' s own community in Australia, into poignant memories of childhood, and offers the reader insights into: new ways of thinking about children and their communities; the act of listening as emergent and alive; ourselves as mobile and multiple subjects; the importance of remaining open to the not-yet-known. Defining research as diffractive, and as experimental, Davies ' relationship to the teachers and pedagogues she worked with is one of co-experimentation. Her relationship with the children is one in which she explores the ways in which her own new thinking and being

might emerge, even as old ways of thinking and being assert themselves and interfere with the unfolding of the new. She draws us into her ongoing experimentation, asking that we think hard, all the while delighting our senses with the poetry of her writing, and the stories of her encounters with children.

For the Orang Rimba of Sumatra – and tropical foragers in general – life in the forest engenders a kind of “connectedness” that is contingent not only on harmonious relations between people, but also between people and the non-human environment, including those supernatural agencies of the forest that people depend on for their spiritual and emotional

wellbeing. Exploring this world, anthropologist Ramsey Elkholy treats embodied action and perception as the basis of shared experience and shows how various forms of embodied experience constitute the very foundations of human culture. In a unique methodological contribution, Elkholy adopts a set of body-centered approaches that reflect and capture the day-to-day, moment-to-moment ways in which people engage with the world. *Being and Becoming* is an important contribution to phenomenological anthropology, hunter-gatherer studies, and to Southeast Asian ethnography more generally.
