Business Statistics: A First Course, First Canadian Edition, recognizes both the changing curriculum and the changing pedagogy for teaching introductory statistics. It focuses on application, streamlines and reorganizes topics, sheds unneeded theoretical details, and recognizes learning styles of the current generation of students, making it an attractive choice for one-semester Business Statistics courses at Canadian universitites and colleges. The Canadian edition uses illustrative case studies and chapter exercises that focus on business and management of Canadian companies, large and small. The writing has Canadian style, perspective, and sensibility, not just changes to spelling and metric measurements. The book recognizes that Canada has public policy, governmental structure and mandate (federal, provincial, and municipal), economic systems (banking and finance), social services, health care, sports and entertainment are different from the United States. While the book is indeed Canadian, it also shows how statistics has no geographical borders, and is a vital part of building and enhancing the global community.

Essentials of Business Statistics offers a student-friendly, applications-based approach to teaching a course that is generally perceived as being very technical. Students learn how and why statistical tools are used and benefit from a walk-through approach where new concepts are applied to clear examples.

Conceptual and applied, with emphasis on analyzing and interpreting Canadian data to make informed business decisions. The book draws students in using a conversational writing style and delivers content with a fresh, exciting approach that reflects the authors' blend of teaching, consulting, and entrepreneurial experiences. KEY TOPICS: Introduction to Statistics; Data; Surveys and Sampling; Displaying and Describing Categorical Data; Displaying and Describing Quantitative Data; Scatterplots, Association, and Correlation; Introduction to Linear Regression; Randomness and Probability; Random Variables and Probability Distributions; Sampling Distributions; Confidence Intervals for Proportions; Testing Hypotheses about Proportions; Confidence Intervals and Hypothesis Tests for Means; Comparing Two Means; Design of Experiments and Analysis of Variance (ANOVA); Inference for Counts: Chi-Square Tests; Nonparametric Methods; Inference for Regression; Understanding Regression Residuals; Multiple Regression; Building Multiple Regression Models; Time Series Analysis; Decision Making and Risk; Quality Control MARKET: Appropriate for the Intro to Business Statistics-One or Two Term course.
