We are glad to present in this volume the proceedings of Information Hiding 2009, which was held in Darmstadt, Germany, during June 8-10,2009.The c- ference was organized by the Center for Advanced Security Research Darmstadt (CASED). Continuing the tradition of previous editions, we tried to create a balanced program, covering di?erent aspects of information hiding, ranging from di- tal watermarking to steganography and steganalysis and information forensics. Furthermore, we see new topics, such as physically unclonable functions and hardware Trojan horse detection, being addressed at the conference. The selection of the

program was a very challenging task. In total, we received 55 submissions, from which we accepted 19 papers for inclusion in the proceedings. Each submission was refereed by three reviewers. At this point we would like to thank all authors who submitted their latest work to IH 2009 - thus assuring that Information Hiding continues to be the top forum of our community. Furthermore, we thank all members of the Program Committee, the local organizers and all external reviewers for their efforts to ensure an exciting and rewarding conference. We hope that you enjoy reading the proceedings and maybe find inspiration for your future work.

There are 50 places at The Oaks, the best grammar school in Letchbury, and 1,000 children applying. Competition is fierce and parents are prepared to do everything and anything to get their child one of the coveted spaces. Close friends Lily, Julie, Karen and househusband Paul aren't overly concerned. After all, aren't their children are bright and sociable enough? But they're quickly shaken out of their complacency when enrolment time approaches and turns out to be little more than a rigged lottery, where only the most ruthless hold the cards. Marriages and friendships crumble under the pressure, fake addresses abound and tutors rates soar. As measures get more and more extreme, the four quickly rally their troops and throw themselves into the battle for big school. Initially wary to be in competition with each other, they realise that the only way of out-smarting the rest of the pack is by coming up with a plan. Because getting their kids into The Oaks will demand determination and strategy akin to Mission Impossible ...

Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever-more apparent. Digital forensics involves investigating computer systems and digital artefacts in general, while multimedia forensics is a sub-topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices, such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics, bringing two closely related fields of forensic expertise together to identify and understand the current state-of-the-art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification, and image forgery detection among many others. Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement, and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices Offers not only explanations of techniques but also real-world and simulated case studies to illustrate how digital and multimedia forensics techniques work Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies

Macro, or close-up, photography is gaining popularity, and this book covers all of the challenges associated with taking great close-ups: depth of field, focus, and exposure. Copublished with Photoworkshop.com, a leading online educational resource for both beginning and professional photographers, this task-oriented reference allows readers to learn by doing and offers outstanding examples and instructions.

This book constitutes revised selected papers from the 14th International Workshop on Digital-Forensics and Watermarking, IWDW 2015, held in Tokyo, Japan, in October 2015. The 35 papers presented in this volume were carefully reviewed and selected from 54 submissions. The contributions are organized in topical sections named: digital forensics; steganography and steganalysis; digital watermarking; reversible data hiding; and visual cryptography.
