Church Sound Systems

Your church's sound system needs to direct sound to where people will be and away from walls and ceilings. You need speakers that match the size and geometry of the room. A long, skinny room with a high ceiling will require a different approach than a short, wide room with a low ceiling. What's your worship style?

More and more, churches are investing in larger sound systems that are very sophisticated. To gain more control over the entire sound, instruments are being sent through the sound system giving the sound person complete control over the mix. In a smaller church, it usually isn't necessary to add instruments into the sound system.

Pastors, choirs, musicians and guest speakers rely on a quality sound system to clearly carry and broadcast their messages during services and events. Technical skill is required to set up, maintain, and run church sound systems, as well as troubleshoot any glitches that might occur.

Troubleshooting Your Church Sound System

Assisted listening systems are one of the most overlooked components of a church sound system. By not including assisted listening (or “hearing assist”) devices in your sound system, it is possible that members of your congregation are missing out on hearing God’s Word, and you may even be breaking the law. What is Assisted Listening?
