There has only ever been one man in Frankie's life: her father, Doug Cooper. That is, until she takes the job of amateur jockey at Aspen Valley Racing Stables. Here, she crosses paths with star rider, Rhys Bradford. Her crush on him would be made so much simpler if they didn't both have their eye on the same prize: the coveted ride on Grand National favourite, Peace Offering. In the turbulent run-up to National Hunt's biggest event, questions are raised. What exactly does Doug have against the Bradfords? Is Rhys playing games with

her heart? Will Ta' Qali show his true potential in time to warrant his place at Aspen Valley? Why do there have to be so many blasted calories in strawberry cheesecake? And lastly, who exactly is Francesca Cooper? Frankie's curiosity unearths some long-buried secrets that their keepers would rather remain buried. The Winter Market in the French Quarter is in full swing, but murder isn't taking a holiday in this festive mystery in the New York Times bestselling Scrapbooking series. The holidays are a busy time for scrapbook shop owner Carmela Bertrand—but not so hectic that she doesn't have time to enjoy browsing the booths at the Winter Market with her best friend, Ava. The last thing the ladies expect to see is a lurching man stabbed by a serving fork, dying in front of them. The victim is loathed restaurant critic Martin Lash, who posted his scathing reviews on the Glutton for Punishment website. And the prime suspect is New Orleans restaurateur Quigg Brevard—who was seen giving the critic a tongue-lashing minutes before someone stuck a fork in him. An old flame of Carmela's, Quigg asks for her help, which does not please her current beau, Detective Edgar Babcock, to say the least. Before her relationship is the next victim, Carmela needs to find a murderer who had no reservations about punishing the culinary curmudgeon... “ The plot is detailed with layers of mysteries...The rich descriptions and dialog bring this story to life. ” —Open Book Society

Multiple-input multiple-output (MIMO) technology constitutes a breakthrough in the design of wireless communications systems, and is already at the core of several wireless standards. Exploiting multipath scattering, MIMO techniques deliver significant performance enhancements in terms of data transmission rate and interference reduction. This 2007 book is a detailed introduction to the analysis and design of MIMO wireless systems. Beginning with an overview of MIMO technology, the authors then examine the fundamental capacity limits of MIMO systems. Transmitter design, including precoding and space-time coding, is then treated in depth, and the book closes with two chapters devoted to receiver design. Written by a team of leading experts, the book blends theoretical analysis with physical insights, and highlights a range of key design challenges. It can be used as a textbook for advanced courses on wireless communications, and will also appeal to researchers and practitioners working on MIMO wireless systems.
