Business scandals from Enron to WorldCom have escalated concerns about corporate governance into a full-blown crisis. Institutional investors and legislators have dominated the debate and enacted important changes in corporate accounting and other areas. But Colin B. Carter and Jay W. Lorsch say that we must now focus on the performance of corporate boards. This timely book argues that boards are being pressed to perform unrealistic duties given their traditional structure, processes, and membership. Carter and Lorsch propose a strategic redesign of boards--making them better attuned to their oversight, decision-making, and advisory roles--to enable directors to meet 21st century challenges successfully. Based on the authors' deep expertise and longtime experience working with boards around the world, and on a probing survey of CEOs, Carter and Lorsch help boards to develop a realistic value proposition customized to the company they serve. The authors explore the core dilemmas and responsibilities

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.
