coding in preparation for the cfpc tm exam it covers all topics tested in the actual exam and is filled with practical

Among the topics covered in Codebuster's CPT-4 Outpatient Coding Reference and Study Guide are outpatient guidelines, CPT format and conventions, plus terminology. New for 2012 are a new section on Skin Replacement Surgery found in the chapter on the Integumentary System, and significant updates to chapters on the Musculoskeletal, Respiratory, Digestive, and Nervous Systems. This study guide assists HIM professionals prepare for professional coding exams such as the CCS, CCS-P, and CPC exams. The text serves as an excellent resource for coders who need to refresh or expand their CPT-4 coding skills. Coders can look up various diagnoses and procedures for the applicable coding guideline, while having access realistic coding scenarios that are likely to be similar to the coding problems experienced on the job. The book covers the surgery section of CPT-4 and Anesthesiology. Each chapter stands on its own; thus, the reader can go through the chapters in any order. There is a chapter-by-chapter analysis of the various body systems based on the surgery section of the CPT coding book. All chapters contain, in addition to the basic coding

Read PDF Cpt Code Study Guide

guidelines, critical coding questions, coding tips, coding examples, as well as a quiz at the end of each chapter. There is also a section on coding from operative reports. The operative reports are categorized by body system. The book is written in a step-by-step format and is very easy to follow. The content has been chosen to for two purposes: 1. Target the most frequently encountered coding situations in the outpatient setting. 2. Provide the knowledge base to master the outpatient coding concepts tested on the CCS Exam. The text has 236 case scenario short answer questions (CPT codes), 38 operative reports (ICD-9 and CPT codes), and 23 full medical record case studies (ICD-9 and CPT codes). Each question is highly relevant and reflects a coding situation most hospital-based outpatient coders will face. The text strives to ensure the reader understands every diagnosis and procedure discussed: thorough discussion of symptoms, standard treatment protocols, and medications. Coding examples and quizzes help clarify the information presented. 23 Case Studies have been constructed to mimic real-life outpatient medical records. Apply your knowledge from Chapters 1-15 and the Operative Reports to master coding from medical records. Each Case Study presents a complete medical record with associated ancillary documents. The records will test your ability to code in a live setting. Coders can assess their coding efficiency based on their accuracy and speed, critical for on

the job practice and exam preparation. The Answer Key contains the rationale for how all codes were determined for the Case Studies. The text is updated every year to reflect the annual CPT coding changes. Linda Kobayashi, BA, RHIT, CCS, has been a coder and coding manager for almost 20 years. Since 1998, Ms. Kobayashi has owned and operated Codebusters, Inc., a nationwide coding consulting company. Widely regarded as a medical coding and auditing expert, she has conducted workshops on a variety of coding topics, including CCS Exam preparation workshops. Throughout her career the author has remained professionally active, as an AHIMA member as well as a member of her state association, CHIA (California Health Information Association). Her formal training includes a teaching credential from California State University Los Angeles, a B.A. degree in English Literature from University of California Los Angeles, an RHIT from AHIMA after completing the RHIT program at East Los Angeles College, and a CCS certificate from AHIMA. Extensive experience as a hands-on coder, auditor and educator, and has given the author the expertise to help coders prepare for the professional coding environment.

AAPC's Official CPC® Certification Study guide is specifically designed to help individuals prepare for the CPC® exam. Twenty chapters will guide you through a review of anatomy and terminology,

the coding and billing field will learn how to appropriately select the correct codes for the services and procedures performed. It is crucial to understand and correctly apply the CPT coding guidelines for each section and subsection of the CPT codebook. This valuable resource addresses the general guidelines for each at the beginner's level, and facilitates comprehension and application of the CPT coding guidelines. Each chapter contains valuable features to provide further educational guidance on appropriate coding, such as:

- * Check your Knowledge -- questions and answers to test your comprehension of the material
- * Key Terms -- defines fundamental terms used within the text for ease of use
- * Coding Tips -- helpful information listed throughout each chapter
- * Illustrations -- specific to the anatomy of the procedures and codes
- * "Real-life" coding examples -- teach you how to apply your new skills
- * Chapter exercises-- hands-on exercises challenge your knowledge of each chapter

Whether you are a student or a self-learner, this book will teach you the essentials of CPT coding, and help to launch you into the exciting career of coding.

These online practice exams will add an additional 150 questions to your preparation.

Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician's office, hospital outpatient facility or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning

Read PDF Cpt Code Study Guide

the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, (i.e. the transcription of the doctor's notes, ordered laboratory tests, requested imaging studies and other sources) to verify the work that was done. Then the coder must assign CPT codes, ICD-9 codes and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions, covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation assignments, HCPCS, UB04, and CPT.

To help individuals prepare for the COC™ (formerly CPC-H®) examination, the AAPC has developed the COC™ Study Guide. In each chapter of the study guide, pertinent outpatient/facility coding principles are followed by coding scenarios related to that chapter. The study guide is not an introduction to coding but a review of coding concepts.
