programming tools. While there is a great deal of hype surrounding the use of Linux in embedded systems, there is not a lot of practical information. Building Embedded Linux Systems is the first in-depth, hard-core guide to putting together an embedded system based on the Linux kernel. This indispensable book features arcane and previously undocumented procedures for:

- Building your own GNU development toolchain
- Using an efficient embedded development framework
- Selecting, configuring, building, and installing a target-specific kernel
- Creating a complete target root filesystem
- Setting up, manipulating, and using solid-state storage devices
- Installing and configuring a bootloader for the target
- Cross-compiling a slew of utilities and packages
- Debugging your embedded system using a plethora of tools and techniques

Details are provided for various target architectures and hardware configurations, including a thorough review of Linux's support for embedded hardware. All explanations rely on the use of open source and free software packages. By presenting how to build the operating system components from pristine sources and how to find more documentation or help, this book greatly simplifies the task of keeping complete control over one's embedded operating system, whether it be for technical or sound financial reasons.

novelist, Theodore Dreiser collected crime stories for years of young men in relationships with young women of poorer means, where the young men found a richer, prettier girl who would go with him, and often took extreme measures to escape from the first girl. *An American Tragedy*, based on one of the most infamous of those real-life stories, is a study in lazy ambition, the very real class system in America, and how easy it is to drift into evil. It is populated with poor people who desire nothing more than to be rich, rich people whose only concern is to keep up with their neighbors and not be associated with the "wrong element," and elements of both who care far more about appearances than reality. It offers further evidence that the world may be very different from 100 years ago, but the people in it are very much the same.
