Trusted advice on finding a coach and getting more out of life Life coaching is a popular, though unregulated, personal development tool. This no-nonsense guide debunks the myths behind life coaching and gives expert advice on incorporating it into daily life. Whether readers want to self-coach or work with a professional, this savvy resource provides essential tips on getting priorities straight, being more productive, and achieving goals. Jeni Mumford (London, UK) is a qualified personal life coach and an accredited NLP practitioner.

The 10th edition of Elementary Differential Equations and Boundary Value Problems, like its predecessors, is written from the viewpoint of the applied mathematician, whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and approximation that have proved useful in a wide variety of applications. While the general structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 10th edition includes new problems, updated figures and examples to help motivate students. The book is written primarily for undergraduate students of mathematics, science, or engineering, who typically take a course on differential equations during their first or second year of study. WileyPLUS sold separately from text.

Improve the writing and speaking skills you use everyday Graceless with grammar? Perplexed by punctuation? Have no fear!
