L'action du Conseil de l'Europe en faveur de la démocratie est fortement axée sur l'éducation : l'éducation à l'école, mais aussi l'éducation en tant que pratique de la démocratie tout au long de la vie, comme dans le cadre des activités d'apprentissage non formel. L'éducation aux droits de l'homme et l'éducation à la citoyenneté démocratique font partie intégrante du socle que nous devons bâtir pour faire de la démocratie une réalité durable. Le discours de haine est l'une des formes les plus inquiétantes de racisme et de discrimination qui sévit aujourd'hui en Europe, amplifiée par internet et les médias sociaux. Le discours de haine en ligne n'est que la partie visible de l'iceberg de l'intolérance et de l'ethnocentrisme. Les jeunes sont directement concernés, en tant qu'acteurs et victimes d'abus des droits de l'homme en ligne. L'Europe a besoin que les jeunes veillent aux droits de l'homme et les protègent : c'est là l'assurance-vie de la démocratie. Connexions vise à soutenir le Mouvement contre le discours de haine, autrement dit, la campagne de la jeunesse du Conseil de l'Europe pour les droits de l'homme en ligne. Connexions est un outil précieux pour les éducateurs qui souhaitent aborder le discours de haine en ligne sous l'angle des droits de l'homme, tant dans le système éducatif formel que dans le cadre de l'éducation informelle. Ce manuel a été conçu pour travailler avec des apprenants de 13 à 18 ans, mais les activités proposées peuvent être adaptées à d'autres groupes d'âge.

In short, it provides an all rounded research and industry updates about the current and future advances in this area. These are the two sectors that are developing rapidly with direct applications of serious games. With advances in technologies and a new perspective on patient engagement and public expectations, the healthcare sector is increasingly turning to serious games to solve problems. Subconscious Learning via Games and Social Media will share expert opinions on the development and application of game technologies for health-related serious games. Our commercial and non-commercial expert comes from different aspects of the healthcare system from clinicians to therapist. The scope ranges from population health to specific medical domain applications. In the education sector, digital games have a great potential to improve learning of both adults and children. It is important to understand how to design games that could create long term behavioral change rather than short term alterations. In these chapters, we discuss how the serious games should be designed and deployed for both adults and children.
