of classes can be created and added to an object's modifier stack using the `addModifier()` or `modPanel.addModToSelection()` methods. Unless otherwise noted, the term modifier will be used to mean members of either class. By making a single modifier and adding it to several objects, you are sharing the modifier between the objects, as you would by applying a modifier to a selection of objects in the 3ds Max user interface. The constructors in the following classes can take any of the listed properties as optional keyword arguments with the defaults as shown. Accessing Existing Modifiers Existing modifiers can be accessed in two ways: `Node.Property` Access Modifiers can be accessed as a property of a node.
