The demand for high quality detailed public finance statistics covering a globally representative sample of countries has increased dramatically during the recent financial crisis. Due to the complexity of public finance statistics, however, such data tend to be either available in oversimplified high level aggregates and lacking in methodological transparency, or, available with a great level of detail and a unified methodological approach yet overly complicated to understand. The IMF ' s Government Finance Statistics Yearbook shows fiscal data of around 140 countries following the Government Finance Statistics Manual 2001 framework. The associated database includes data series covering over an almost 40 year period. The IMF's Statistics Department embarked on several initiatives to improve its accessibility.

For over eighty years the Arab region has been deriving massive wealth from its natural resources. Nevertheless, its economic performance has been at the mercy of ebbs and flows of oil prices and its resources have been slowly depleting. The two critical questions are why and how Arab countries might escape the oil curse. Institutions and Macroeconomic Policies in Resource-Rich Arab Economies focuses on the unique features of the Arab world to explain the disappointing outcomes of macroeconomic policy. It explores the interaction between oil and institutions to draw policy recommendations on how Arab countries can best exploit their oil revenues to avoid the resource curse. Case studies and contributions from experts provide an understanding of macroeconomic institutions (including their underlying rules, procedures and institutional arrangements) in oil-rich Arab economies and of their political economy environment, which has largely been overlooked in previous research. Institutions and Macroeconomic Policies in Resource-Rich Arab Economies offers novel macroeconomic policy propositions for exchange rate regimes, fiscal policy and oil wealth distribution that is more consistent with macroeconomic stability and fiscal sustainability. These policy reforms, if implemented successfully, could go a long way in helping the resource-rich countries of the Arab region and elsewhere to avoid the oil curse.

My Journey with the United Nations and Quest for the Horn of Africa ' s Unity and Justice for Ethiopia by Kidane Alemayehu My Journey with the United Nations and Quest for the Horn of Africa's Unity and Justice for Ethiopia is a landmark in the annals of Ethiopian literature and history. It gives a huge assignment to the present and future generations of Ethiopians - namely that justice must be done, if not today, then tomorrow, and if not tomorrow, then the day after tomorrow. The Catholic Church, as the Universal Church, cannot remain mum in the face of such horrendous accusations supported by evidence. It is our fervent hope that, as Vicar of Jesus His Holiness, Pope Francis, who is already well known for his humility and steadfast stand for justice, will address this outstanding issue of apology to the Ethiopian people.

This volume presents the proceedings of the fourth in a series of highly successful conferences. Coastal management issues covered in the volume include planning and implementation, economic evaluation, the contribution of technology, legal and geomorphic impacts, and the increasingly important subjects of managing risk and uncertainty. Themes that are of particular interest for the future are discussed, including the UK's flood defence aims, objectives and targets, and the need or otherwise for a European directive for coastal management.

This book confronts the difficult problems that arise in claim situations. There is extensive reference to UK and international case law, and a systematic approach to various types of claims, assisted by helpful explanatory diagrams. Suitable for construction professionals and contractors, and undergraduate and postgraduate students.

Vols. 29-30 include papers of the International Engineering Congress, Chicago, 1893; v. 54 includes papers of the International Engineering Congress, St. Louis, 1904.

Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region ' s contemporary development challenges through the lens of the UN ' s Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and Economics of the GCC states.
