A historian of American institutions and ideas, Wilder's most recent book is the award-winning *Ebony & Ivy: Race, Slavery, and the Troubled History of America's Universities* (Bloomsbury, 2013), which Kirkus Reviews named one of the best nonfiction books of the year. It inspired the Grammy Award-winning artist Esperanza Spalding's song, "Ebony and Ivy" in *Emily's D+Evolution* (Concord Records, 2016).

MIT history professor Craig Steven Wilder '94GSAS seeks to change that. He argues that some of the nation's oldest institutions, Columbia included, played a major role in the extermination of indigenous populations and the enslavement of people of African descent from the seventeenth through the nineteenth centuries.

Spanning three centuries of Brooklyn history from the colonial period to the present, *A Covenant with Color* exposes the intricate relations of dominance and subordination that have long characterized the relative social positions of white and black Brooklynites. Craig Steven Wilder -- examining both quantitative and qualitative evidence and utilizing cutting-edge literature on

troubled history of race theory -- demonstrates how ideas of race were born, how they evolved, and how they were carried forth into contemporary society. In charting the social history of one of the nation's oldest urban locales, Wilder contends that power relations -- in all their complexity -- are the starting point for understanding Brooklyn's turbulent racial dynamics. He spells out the workings of power -- its manipulation of resources, whether in the form of unfree labor, privileges of citizenship, better jobs, housing, government aid, or access to skilled trades. Wilder deploys an extraordinary spectrum of evidence to illustrate the mechanics of power that have kept African American

Brooklynites in subordinate positions: from letters and diaries to family papers of Kings County's slaveholders, from tax records to the public archives of the Home Owners Loan Corporation. Wilder illustrates his points through a variety of cases, including banking interests, the rise of Kings County's colonial elite, industrialization and slavery, race-based distribution of federal money in jobs, and mortgage loans during and after the Depression. He delves into the evolution of the Brooklyn ghetto, tracing how housing segregation corralled African Americans in Bedford-Stuyvesant. The book explores colonial enslavement, the rise of Jim Crow, labor discrimination and union

exclusion, and educational inequality. Throughout, Wilder uses Brooklyn as a lens through which to view larger issues of race and power on a national level. One of the few recent attempts to provide a comprehensive history of race relations in an American city, *A Covenant with Color* is a major contribution to urban history and the history of race and class in America.

Slavery and the University is the first edited collection of scholarly essays devoted solely to the histories and legacies of this subject on North American campuses and in their Atlantic contexts. Gathering together contributions from scholars,

activists, and administrators, the volume combines two broad bodies of work: (1) historically based interdisciplinary research on the presence of slavery at higher education institutions in terms of the development of proslavery and antislavery thought and the use of slave labor; and (2) analysis on the ways in which the legacies of slavery in institutions of higher education continued in the post-Civil War era to the present day. The collection features broadly themed essays on issues of religion, economy, and the regional slave trade of the Caribbean. It also includes case studies of slavery's influence on specific institutions, such as Princeton University, Harvard

University, Oberlin College, Emory University, and the University of Alabama. Though the roots of Slavery and the University stem from a 2011 conference at Emory University, the collection extends outward to incorporate recent findings. As such, it offers a roadmap to one of the most exciting developments in the field of U.S. slavery studies and to ways of thinking about racial diversity in the history and current practices of higher education.

Twentieth century Harlem, voluntary associations have been a fixture of African-American communities. In the Company of Black Men examines New York City over three centuries to show that enslaved Africans provided the institutional foundation upon which African-American religious, political, and social culture could flourish. Arguing that the universality of the voluntary tradition in African-American communities has its basis in collectivism—a behavioral and rhetorical tendency to privilege the group over the individual—it explores the institutions that arose as enslaved Africans exploited the potential for group action and mass resistance. Craig Steven Wilder's research is

particularly exciting in its assertion that Africans entered the Americas equipped with intellectual traditions and sociological models that facilitated a communitarian response to oppression.

Presenting a dramatic shift from previous work which has viewed African-American male associations as derivative and imitative of white male counterparts, *In the Company of Black Men* provides a groundbreaking template for investigating antebellum black institutions.

What to do when human rights give way to profits Complicity is a story of the skeletons that remain in this nation's

closet.”—San Francisco Chronicle

The North's profit from—indeed, dependence on—slavery has mostly been a shameful and well-kept secret . . . until now.

Complicity reveals the cruel truth about the lucrative Triangle Trade of molasses, rum, and slaves that linked the North to the West Indies and Africa. It also discloses the reality of Northern empires built on tainted profits—run, in some cases, by abolitionists—and exposes the thousand-acre plantations that existed in towns such as Salem, Connecticut. Here, too, are eye-opening accounts of the individuals who profited

Culled from long-ignored documents and reports—and bolstered by rarely seen photos, publications, maps, and period drawings—*Complicity* is a fascinating and sobering work that actually does what so many books pretend to do: shed light on America's past.

Winner of the 2015 Avery O. original sin, perhaps, but isolated in time and divorced from America's later success. But to do so robs the millions who suffered in bondage of their full legacy. As historian Edward E. Baptist reveals in *The Half Has Never Been Told*, the expansion of slavery in the first eight decades after American independence drove the evolution and modernization of the United States. In the span of a single lifetime, the South grew from a narrow coastal strip of worn-out tobacco plantations to a continental cotton empire, and the United States grew into a modern, industrial, and capitalist economy. Told through intimate slave narratives, plantation records, newspapers, and the

history.

From the University of Virginia's very inception, slavery was deeply woven into its fabric. Enslaved people first helped to construct and then later lived in the Academical Village; they raised and prepared food, washed clothes, cleaned privies, and chopped wood. They maintained the buildings, cleaned classrooms, and served as personal servants to faculty and students. At any given time, there were typically more than one hundred enslaved people residing

alongside the students, faculty, and their families. The central paradox at the heart of UVA is also that of the nation: What does it mean to have a public university established to preserve democratic rights that is likewise founded and maintained on the stolen labor of others? In *Educated in Tyranny*, Maurie McInnis, Louis Nelson, and a group of contributing authors tell the largely unknown story of slavery at the University of Virginia. While UVA has long been celebrated as fulfilling Jefferson's desire to educate citizens to lead and govern, McInnis and Nelson document the burgeoning political rift over slavery as Jefferson tried to protect southern men from anti-slavery ideas in northern

To be a moral witness is perhaps the highest calling of journalism, and in this unforgettable, highly readable account of contemporary slavery, author Benjamin Skinner travels around the globe to personally tell stories that need to be told -- and heard. As Samantha Power and Philip Gourevitch did for genocide, Skinner has now done for modern-day slavery. With years of reporting in such places as Haiti, Sudan, India, Eastern Europe, The Netherlands, and, yes, even

suburban America, he has produced a vivid testament and moving reportage on one of the great evils of our time. There are more slaves in the world today than at any time in history. After spending four years visiting a dozen countries where slavery flourishes, Skinner tells the story, in gripping narrative style, of individuals who live in slavery, those who have escaped from bondage, those who own or traffic in slaves, and the mixed political motives of those who seek to combat the crime. Skinner infiltrates trafficking networks and slave sales on five continents, exposing a modern flesh trade never before portrayed in such proximity. From mega-harems in Dubai to illicit brothels in

Bucharest, from slave quarries in India to child markets in Haiti, he explores the underside of a world we scarcely recognize as our own and lays bare a parallel universe where human beings are bought, sold, used, and discarded. He travels from the White House to war zones and immerses us in the political and flesh-and-blood battles on the front lines of the unheralded new abolitionist movement. At the heart of the story are the slaves themselves. Their stories are heartbreaking but, in the midst of tragedy, readers discover a quiet dignity that leads some slaves to resist and aspire to freedom. Despite being abandoned by the international community, despite suffering a crime so monstrous as

To strip their awareness of their own humanity, somehow, some enslaved men regain their dignity, some enslaved women learn to trust men, and some enslaved children manage to be kids.

Skinner bears witness for them, and for the millions who are held in the shadows. In so doing, he has written one of the most morally courageous books of our time, one that will long linger in the conscience of all who encounter it, and one that -- just perhaps -- may move the world to constructive action.
