Succeed in the course with this Study Guide for ESSENTIALS OF WORLD REGIONAL GEOGRAPHY, filled with chapter objectives, critical thinking problems and a variety of self-test questions and answers.

The new edition of ESSENTIALS OF WORLD REGIONAL GEOGRAPHY provides both a cultural and physical geographic understanding of the world's eight regions in an easily customizable format designed to fit different course structures while retaining a true global appreciation. The text's hallmark pedagogical feature, "Profile" chapters, provide a brief, thematic overview of each of the eight regions. This pedagogical organization allows an instructor to cover the entire world in thirteen weeks, spending as little or as much time on each region as they need, or even creating a custom book to fit their course. Subsequent regional chapters provide traditional, finer-scale details on a local level, including geographical factors and in-depth observations found in a number of boxed elements; "Problem Landscapes," "Definitions and Insights," "Regional Perspectives," and "Perspectives from the Field." "Geography of..." a new pedagogical feature, introduces students to cultural and regional specifics, with topics ranging from "Ethnic Geography" to the "Geography of Terrorism" and many more. These boxed elements combine to identify common themes across regional boundaries, clarify terms and concepts, and explore controversial world matters. Furthermore, the Fifth Edition integrates active, online learning with GeographyNow, the first assessment-centered student tutorial system developed for any geography course. GeographyNow icons found throughout the book enhance student learning by providing a personalized learning plan that emphasizes the text's global themes through map interpretation exercises, review of chapter objectives, and testing of chapter and regional concepts.

This shorter version of the highly successful Contemporary World Regional Geography, 3e gives readers a fresh new approach that combines fundamental geographical elements, internal regional diversity, and contemporary issues. This approach allows serious discussion of cultural and environmental issues, as well as political and economic issues. The main innovation in this completely rewritten text is in the ordering of the material covered. While other texts cut photos, illustrations, and boxed material from their WRG books, this essentials version is a completely rewritten text by the authors of Contemporary World Regional Geography, 3e. Each of the nine regional chapters opens with a one- or two-page map of the region, short accounts of people or events to provide a personal flavor of the region, an outline

of the chapter contents, and a short section placing the region in its wider global context. Each regional chapter is consistently organized by three sections. The first section summarizes the distinctive physical and human geographies of the region; the second section explores the internal diversity of the region at subregional, selected country, and local levels. The third section focuses on a selection of contemporary issues that are important to the people of each region and frequently have implications for the rest of the world. Each regional chapter follows the same framework, allowing students to easily make comparisons from one world region to the next. Students are encouraged to consider what it means to be part of a global community and to develop their geographical understandings of world events. The authors have created a text that is readable, with a consistent structure within chapters, containing superior maps and illustrations, and finally □ to offer a concise and more affordable text.
